Computerized Sewing and Embroidery Machine

Operation Manual

Important Safety Instructions

Please read these safety instructions before attempting to use the machine. This machine is intended for household use.

DANGER - To reduce the risk of electric shock

1 Always unplug the machine from the electrical outlet immediately after using, when cleaning, when making any user servicing adjustments mentioned in this manual, or if you are leaving the machine unattended.

WARNING - To reduce the risk of burns, fire, electric shock, or injury to persons.

- 2 Always unplug the machine from the electrical outlet when removing covers, lubricating, or when making any adjustments mentioned in the instruction manual
- To unplug the machine, switch the machine to the symbol "O" position to turn it off, then grasp the plug and pull it out of the electrical outlet. **Do not** pull on the cord.
- Plug the machine directly into the electrical outlet. Do not use an extension cord.
- Always unplug your machine if the power is cut.
- 3 Never operate this machine if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or water is spilled on the unit. Return the machine to the nearest authorized dealer or service center for examination, repair, electrical or mechanical adjustment.

4 Always keep your work area clear:

- Never operate the machine with any air openings blocked. Keep ventilation openings of the sewing machine and foot control free from the build up of lint, dust, and loose cloth.
- **Do not** store objects on the foot controller.
- **Do not** use extension cords. Plug the machine directly into the electrical outlet.
- Never drop or insert any object into any opening.
- **Do not** operate where aerosol (spray) products are being used or where oxygen is being administered.

5 Special care is required when sewing:

- Always pay close attention to the needle. Do not use bent or damaged needles.
- Keep fingers away from all moving parts. Special care is required around the machine needle.
- Switch the sewing machine to the symbol "O" position to turn it off when making any adjustments in the needle area.
- **Do not** use a damaged or incorrect needle plate, as it could cause the needle to break.
- **Do not** push or pull the fabric when sewing, and follow careful instruction when freehand stitching so that you do not deflect the needle and cause it to break.

6 This machine is **not** a toy:

- Your close attention is necessary when the machine is used by or near children.
- Do not use outdoors.

7 For a longer service life:

- When storing this machine, avoid direct sunlight and high humidity locations. Do not use or store the machine near a space heater, iron, halogen lamp, or other hot objects.
- Use only neutral soaps or detergents to clean the case. Benzene, thinner, and scouring powders can damage the case and machine, and should never be used.
- Always consult the operation manual when replacing or installing any assemblies, the presser feet, needle, or other parts to assure correct installation.

8 For repair or adjustment:

- If the Light unit is damaged, it must be replaced by authorized dealer.
- In the event a malfunction occurs or adjustment is required, first follow the troubleshooting table in the back of the operation manual to inspect and adjust the machine yourself. If the problem persists, please consult your local authorized Brother dealer.

Use this machine only for its intended use as described in the manual.

Use accessories recommended by the manufacturer as contained in this manual.

Save these instructions.

The contents of this manual and specifications of this product are subject to change without notice.

Introduction

Thank you for purchasing this sewing machine. Before using this sewing machine, carefully read the "Important Safety Instructions" (page 1), and then study this manual for the correct operation of the various functions. In addition, after you have finished reading this manual, store it where it can quickly be accessed for future reference.

Sewing Machine Features

- Simple bobbin-winding
 - The bobbin can quickly and easily be wound with thread (page 23).
- ② Built-in stitches

You can select from the built-in stitches available, including utility stitches and decorative stitches (page 66).

③ Quick-set bobbin

You can start sewing without pulling up the bobbin thread (page 27).

4 Automatic thread cutting

The thread can be cut automatically after sewing (page 60).

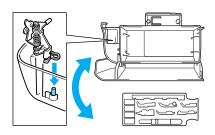

⑤ Embroidery

You can embroider built-in embroidery patterns, characters, framed decorations, and designs from optional embroidery cards (page 129).

Accessories

Included accessories

After opening the box, check that the following accessories are included. If any item is missing or damaged, contact your retailer.

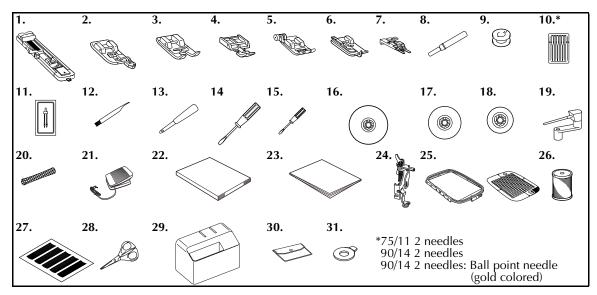

Note .

(For U.S.A. only)

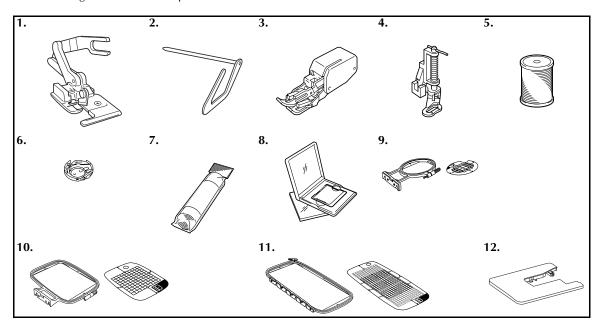

- Foot controller: Model T
 This foot controller can be used on this machine model NV1000.
- The screw of the presser foot holder is available through your authorized dealer. (Part code: XA4813-051)
- The organized accessory tray is available, through your authorized dealer. (Part code: XC4489-051)

Memo

- To obtain optional accessories or parts, contact your sales representative or the nearest authorized service center.
- All specifications are correct at the time of printing. The part codes are subject to change without notice.
- Visit your nearest authorized retailer for a complete listing of optional accessories available for your machine.

Names of Machine Parts and Their Functions

The names of the various parts of the sewing machine and their functions are described below. Before using the sewing machine, carefully read these descriptions to learn the names of the machine parts.

Front view

1 Thread guide plate

Pass the thread around the thread guide plate when threading the upper thread.

② Thread guide cover

Like with the thread guide plate, pass the thread around the thread guide cover when threading the upper thread.

③ Spool pin

Place a spool of thread on the spool pin.

(4) Bobbin winding thread guide

Pass the thread around this thread guide when winding the bobbin thread.

⑤ Top cover

Open the top cover to place the spool of thread on the spool pin.

6 Bobbin winder

Use the bobbin winder when winding the bobbin.

⑦ Operation panel

From the operation panel, stitch settings can be viewed and edited, and operations for using the machine can be displayed (page 13).

8 Embroidery unit connector slot

Plug in the connector for the embroidery unit.

Presser foot lever

Raise and lower the presser foot lever to raise and lower the presser foot

(10) Operation buttons

Use these buttons to operate the machine.

(1) Flat bed attachment

Insert the accessories tray into the accessory compartment of the flat bed attachment. Remove the flat bed attachment when sewing cylindrical pieces such as sleeve cuffs.

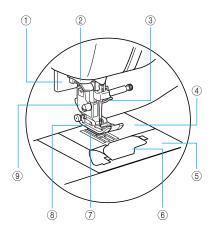

① Thread cutter

Pass the threads through the thread cutter to cut them.

Needle threader lever

Use the needle threader lever to thread the needle.

Needle and presser foot section

Buttonhole lever

Lower the buttonhole lever when sewing buttonholes and bar tacks.

② Thread guide disk

Pass the thread through the thread guide disk when using the needle threader to thread the needle.

3 Needle bar thread guide

Pass the upper thread through the needle bar thread guide.

4 Needle plate

The needle plate is marked with guides for sewing straight seams.

(5) Needle plate cover

Remove the needle plate cover to clean the bobbin case and race.

6 Bobbin cover/bobbin case

Remove the bobbin cover, and then insert the bobbin into the bobbin case.

(7) Feed dogs

The feed dogs feed the fabric in the sewing direction.

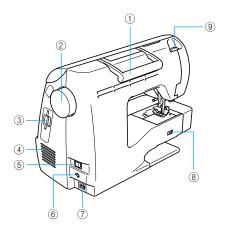

® Presser foot

The presser foot applies pressure consistently on the fabric as the sewing takes place. Attach the appropriate presser foot for the selected stitching.

Presser foot holder

The presser foot is installed onto the presser foot holder.

Right-side/rear view

1 Handle

Carry the sewing machine by its handle when transporting the machine.

② Handwheel

Turn the handwheel toward you (counterclockwise) to raise and lower the needle to sew one stitch.

3 Embroidery card slot

Insert the embroidery card.

4 Air vent

The air vent allows the air surrounding the motor to be exchanged. Do not cover the air vent while the sewing machine is being used.

(5) Main power switch

Use the main power switch to turn the sewing machine on and off.

6 Foot controller jack

Insert the plug on the end of the foot controller cable into the foot controller jack.

(7) Power supply jack

Insert the plug on the power supply cord into the power supply jack.

® Feed dog position switch

Use the feed dog position switch to lower the feed dogs.

9 Presser foot pressure dial

Use the presser foot pressure dial to adjust the amount of pressure that the presser foot applies.

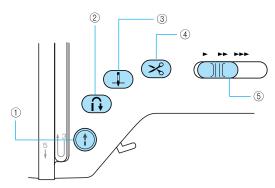

Memo

• Refer to pages 10 through 13 while you are learning to use your machine.

Operation buttons

The operation buttons help you to easily perform various basic sewing machine operations.

① Start/stop button ①

Press the start/stop button to start or stop sewing. The machine sews at a slow speed at the beginning of sewing while the button is pressed. When sewing is stopped, the needle is lowered in the fabric. For details, refer to "Starting to sew" (page 51).

The button changes color according to the machine's operation mode.

Green: The machine is ready to sew or is

sewing.

Red: The machine can not sew.

Orange: The machine is winding the bobbin

thread, or the bobbin winder shaft is moved to the right side.

② Reverse/reinforcement stitch button (1)

Press the reverse/reinforcement stitch button to sew reverse stitches or reinforcement stitches. Reverse stitches are sewn by keeping the button pressed down to sew in the opposite direction. Reinforcement stitches are sewn by sewing 3 to 5 stitches on top of each other. For details, refer to "Securing the stitching" (page 53).

③ Needle position button (1)

Press the needle position button to raise or lower the needle. Pressing the button twice sews one stitch.

④ Thread cutter button (★)

Press the thread cutter button after sewing is stopped to cut both the upper and the bobbin threads. For details, refer to "Cutting the thread" (page 54).

5 Sewing speed controller

Slide the sewing speed controller to adjust the sewing speed.

A CAL

CAUTION

 Do not press the thread cutter button after the threads have already been cut, otherwise the needle may break, the threads may become tangled or damage to the machine may occur.

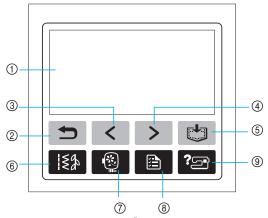

Note

- Do not press the thread cutter button if there is no fabric under the presser foot or while the machine is sewing, otherwise damage to the machine may occur.
- When cutting thread thicker than #30, nylon thread or other special threads, use the thread cutter on the side of the machine. For details, refer to "Using the thread cutter" (page 55).

Operation panel

The front operation panel has an LCD (liquid crystal display) and operation keys.

- ① LCD (liquid crystal display) (touch panel)
 - Selected pattern settings and messages are displayed. Touch the keys displayed on the LCD to perform operations.

For details, refer to "LCD (Liquid Crystal Display) Operation" (page 18).

② Back key ጛ

Press to return to the previous screen.

③ Previous page key

Displays the previous screen when there are items that are not displayed on the LCD.

4 Next page key >

Displays the next screen when there are items that are not displayed on the LCD.

Memory key

Press to enter character embroidery, combined stitch patterns, My Custom Stitch patterns, etc into the sewing machine memory.

⑥ Utility stitch key [됨

Press this key to select a utility stitch or decorative stitch or to design a stitch pattern using the My Custom Stitch function.

- (7) Embroidery key
 - Press this key to sew embroidery.
- Settings key Press to set the needle stop position, the buzzer sound, and more.

Press to get help on using the sewing machine.
Displays simple explanations of setting upper thread / bobbin winding / setting bobbin thread / needle replacement / embroidery unit attachment / embroidery frame attachment / embroidery foot attachment / presser foot replacement.

Turning the Machine On/Off

This section explains how to turn the sewing machine on and off.

Power supply precautions

Be sure to observe the following precautions concerning the power supply.

- Use only regular household electricity for the power source. Using other power sources may result in fire, electric shock, or damage to the machine.
- Turn off the main power and remove the plug in the following circumstances:
 - When you are away from the machine
 - After using the machine
 - When the power fails during use
 - When the machine does not operate correctly due to a bad connection or a disconnection
 - During electrical storms

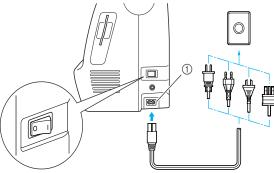

CAUTION

- Do not use extension cords or multi-plug adapters with many other appliances plugged in to them. Fire or electric shock may result.
- Do not touch the plug with wet hands. Electric shock may result.
- When unplugging the machine, always turn off the main power first. Always grasp the plug to remove it from the outlet. Pulling on the cord may damage the cord, or lead to fire or electric shock.
- Do not allow the power cord to be cut, damaged, modified, forcefully bent, pulled, twisted, or bundled. Do not place heavy objects on the cord. Do not subject the cord to heat. These things may damage the cord and cause fire or electric shock. If the cord or plug is damaged, take the machine to your authorized dealer for repairs before continuing use.
- Unplug the power cord if the machine is not to be used for a long period of time. Otherwise a
 fire may result.

Turning on the machine

Prepare the included power cord.

- Make sure that the sewing machine is turned off (the main power switch is set to "\circ\"), and then plug the power supply cord into the power supply jack on the right side of the machine.
- Insert the plug of the power supply cord into a household electrical outlet.

- Power supply jack
- Press the right side of the main power switch on the right side of the machine to turn the machine on (set it to "|").

► The light, LCD and (1) (Start/stop button) light up when the machine is turned on.

Turning off the machine

When you are finished using the sewing machine, turn it off. In addition, before transporting the sewing machine to another location, be sure to turn it off.

- Make sure that the machine is not sewing.
- Press the left side of the main power switch on the right side of the machine to turn the machine off (set it to " \bigcirc ").

- The sewing lamps go off when the machine is turned off.
- Unplug the power supply cord from the electrical outlet. Grasp the plug when unplugging the power
- Unplug the power supply cord from the power supply jack.

supply cord.

If a power outage occurs while the sewing machine is being operated, turn off the sewing machine and unplug the power supply cord. When restarting the sewing machine, follow the necessary procedure to correctly operate the machine.

(For U.S.A. only)

This appliance has a polarized plug (one blade wider than the other). To reduce the risk of electrical shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not modify the plug in any way.

LCD (Liquid Crystal Display) Operation

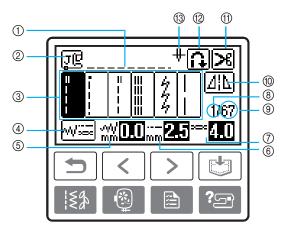

Selected stitch, pattern settings and messages are displayed on the LCD (liquid crystal display) on the front of the sewing machine.

Viewing the LCD

When the power is turned on, the LCD comes on, and the following screen is displayed.

The screen is changed using the keys below the screen, and operations performed by directly touching the icons on the LCD screen.

■ Utility stitch selection screen

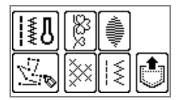

- (1) Selected stitch
- Presser foot to be used
- ③ Stitches
- Stitch settings and twin needle sewing
- (5) Stitch width (mm)
- 6 Stitch length (mm)
- 7) Thread tension
- (8) Number of the selected stitch

- Number of stitches contained in the selected stitch type
- Morizontal mirror image
- (1) Automatic thread cutting
- ② Automatic reverse/reinforcement
- 3 Single/twin needle sewing and needle stop position

■ Stitch type selection screen

Press (Utility stitch key) to display the screen for selecting the stitch type. The details are explained in "Selecting stitching" (page 49).

Memo

- A different screen is displayed when the embroidery unit is attached.
- Refer to "Error messages" (page 171) for messages displayed on the LCD.
- Depending on the model of sewing machine, an animation may be displayed when the power is turned on. When an animation is displayed, the screen above will be displayed if you touch the LCD with your finger.

Changing the machine settings

Various sewing machine operations and sewing settings can be changed. The stitch or machine attributes that can be set are listed below.

Attribute	Icon	Details	Settings
Needle position	‡∀	Specifies where the needle is positioned when the sewing machine is stopped.	Down ₩₩₩ Up
Stitch width control	œ.	Allows the stitch width to be adjusted with the sewing speed controller.	ON OFF
Vertical pattern adjustment	‡	Adjusts the up and down position of the pattern (page 117).	-9 to +9
Thread color		Changes the thread color display on the embroidery screen.	Thread color/Time to embroider/ Needle count/Thread number (#123)
display	画	(When "Thread No. #123" is selected)	Embroidery/Country/Madeira poly/ Madeira rayon/Sulky/Robison anton
Display unit	4	Selects the measurement units that are displayed (only for embroidering).	mm/INCH
Embroidery tension	-0	Adjusts the thread tension for embroidering (only for embroidering).	-8 to +8
Max embroidery speed	தி	Specifies the maximum embroidering speed.	SSO BSO SPM SPM
Buzzer	4 (3)	Specifies whether or not a beep is sounded with each operation (page 175).	ON OFF
Opening screen	\$	Sets whether or not to display the opening screen when the power is turned on. (There are models where this cannot be changed.)	ON OFF
Initial needle position	¥_	Select the straight stitch that is automatically selected when the machine is turned on.	<u> </u>
Language	\$€	Allows the language used in the screens to be changed.	English/German/French/Italian/ Dutch/Spanish/Japanese/Danish/ Norwegian/Finnish/Swedish/ Portuguese/Russian/others
LCD brightness	•	Adjusts the brightness of the LCD.	Lighter 🗕 🛨 Darker
Stitch counter	⊎ ⊪	Display the service count and the total number of embroidery stitches. The service count is a reminder to take your machine in for regular servicing. (Contact your authorized dealer for details.)	
Product number	NO.:	The "NO." is the number for the embroidery and sewing machine.	
Program version	Version:	Display the program version.	

Turn on the sewing machine.

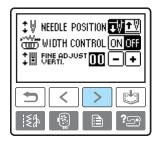

- ▶ The LCD comes on.
- Press 🗎 (Settings key) on the display panel.

- The settings screen appears.
- Press the item to be set.

 Switch screens using (Previous page key) and (Next page key).

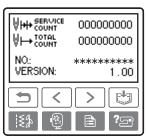

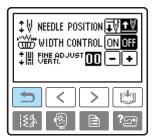

- The items shown in reverse highlighting are the settings at the time of purchase.
- ☐ **Example:** Changing the needle stop position

When settings are complete, press [(Back key).

The initial screen appears again.

Settings that are changed are not lost when the power is turned off.

Checking machine operating procedures

Displays simple explanations of setting upper thread / bobbin winding / setting bobbin thread / needle replacement / embroidery unit attachment / embroidery frame attachment / embroidery foot attachment / presser foot replacement on the LCD.

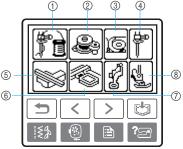

Turn on the sewing machine.

- The LCD comes on.
- Press (Sewing machine help key) on the display panel.

- ▶ The sewing machine help screen appears.
- Press the item to be displayed.

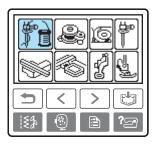

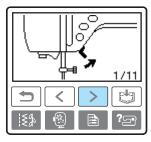

- Upper threading
- ② Bobbin winding
- Bobbin installation
- Needle replacement
- Embroidery unit attachment
- **6** Embroidery frame attachment
- Embroidery foot attachment
- Presser foot replacement
- The first screen describing the procedure for the selected topic appears.
- Pressing (Back key), returns you to the item selection screen.

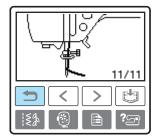

If you press (Previous page key), you return to the previous page.

□ **Example:** Upper threading

After you finish looking, press (Back key) two times.

▶ The initial stitch screen appears again.

Note

 For details on each topic, refer to the corresponding page in this Operation Manual.

Winding/Installing the Bobbin

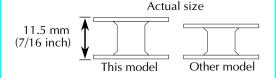

This section describes how to wind the thread onto the bobbin, and then insert the bobbin thread.

Bobbin precautions

Be sure to observe the following precautions concerning the bobbin.

- Only use the Bobbin (part code: SA156, SFB: XA5539-151) designed specifically for this sewing machine. Use of any other bobbin may result in injuries or damage to the machine.
- The included bobbin was designed specifically for this sewing machine. If bobbins from other models are used, the machine will not operate correctly. Use only the included bobbin or bobbins of the same type (part code: SA156, SFB: XA5539-151).

Winding the bobbin

Wind the thread around the bobbin to prepare the bobbin thread.

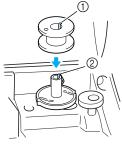

Open the top cover.

Place the bobbin on the bobbin winder shaft so that the spring on the shaft fits into the notch in the bobbin.

Press down on the bobbin until it snaps into place.

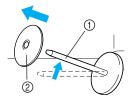

- Bobbin winder shaft spring
- Slide the bobbin winder in the direction of the arrow until it snaps into place.

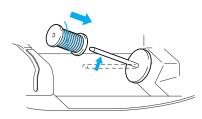

(Start/stop button) lights up in orange.

- Spool pin
 Spool cap
- Place the spool of thread for the bobbin onto the spool pin.

Slide the spool onto the pin so that the spool is horizontal and the thread unwinds to the front at the bottom.

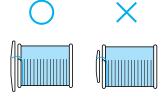

• If the spool is not positioned so that the thread unwinds correctly, the thread may become tangled around the spool pin.

Slide the spool cap onto the spool pin.
Slide the spool cap as far as possible to the right, as shown, with the rounded side on the left.

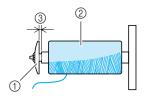

CAUTION

- If the spool or the spool cap is not installed correctly, the thread may become tangled around the spool pin, causing the needle to break.
- Three spool cap sizes are available, allowing you to choose a spool cap that best fits the size of spool being used. If the spool cap is too small for the spool being used, the thread may catch on the slit in the spool or the needle may break.

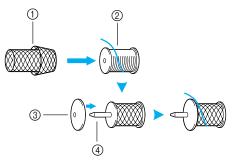

Memo

 When sewing with fine, cross-wound thread, use the small spool cap, and leave a small space between the cap and the spool.

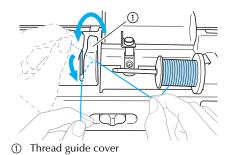

- ① Spool cap (small)
- Spool (cross-wound thread)
- When using thread that winds off quickly, such as transparent nylon thread or metallic thread, place the spool net over the spool before placing the spool of thread onto the spool pin.

If the spool net is too long, fold it to fit the size of the spool.

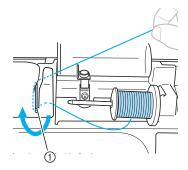

- ① Spool net
- ② Spool
- ③ Spool cap Spool pin

While holding the thread near the spool with your right hand, as shown, pull the thread with your left hand, and then pass the thread behind the thread guide cover and to the front.

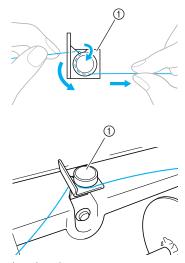

Pass the thread under the thread guide plate, and then pull it to the right.

1 Thread guide plate

Pass the thread under the hook on the thread guide, and then wind it counterclockwise under the pretension disk.

① Thread guide

While holding the thread with your left hand, wind the thread that was pulled out clockwise around the bobbin five or six times with your right hand.

GETTING READY

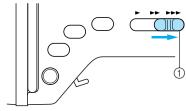

Pass the end of the thread through the guide slit in the bobbin winder seat, and then pull the thread to the right to cut it.

Guide slit in bobbin winder seat (with built-in cutter)

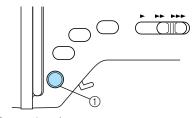

CAUTION

- Be sure to cut the thread as described. If the bobbin is wound without cutting the thread using the cutter built into the slit in the bobbin winder seat, the thread may become tangled in the bobbin or the needle may bend or break when the bobbin thread starts to run out.
- Slide the sewing speed controller to the right.

Speed controller

Press (1) (Start/stop button) once to start winding the bobbin.

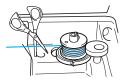

① Start/stop button

 When the bobbin winding becomes slow, press (*) (Start/stop button) once to stop the machine.

A CAUTION

- When the bobbin winding becomes slow, stop the machine, otherwise the sewing machine may be damaged.
- Use scissors to cut the end of the thread wound around the bobbin.

Slide the bobbin winder shaft to the left, and then remove the bobbin from the shaft.

Remove the spool for the bobbin thread from the spool pin, and then close the top cover.

Memo

 When the sewing machine is started or the handwheel is turned after winding the bobbin, the machine will make a clicking sound; this is not a malfunction.

Installing the bobbin

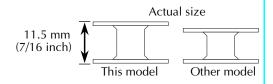

Install the bobbin wound with thread.

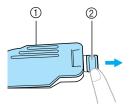

Use a bobbin that has been correctly wound with thread, otherwise the needle may break or the thread tension will be incorrect.

 The bobbin was designed specifically for this sewing machine. If bobbins from other models are used, the machine will not operate correctly. Use only the included bobbin or bobbins of the same type (part code: SA156, SFB: XA5539-151).

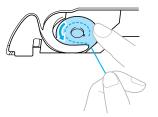

Slide the bobbin cover latch to the right.

- Bobbin cover
- (2) Latch
- The bobbin cover opens.
- Remove the bobbin cover.
- Hold the bobbin with your right hand and hold the end of the thread with your left.

- Be careful not to drop the bobbin.
- Insert the bobbin into the bobbin case so that the thread unrolls to the left.

• Be sure to insert the bobbin correctly.

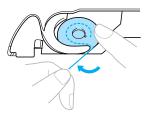

Be sure to hold down the bobbin with your finger and unroll the bobbin thread correctly, otherwise the thread may break or the thread tension will be incorrect.

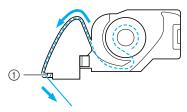

The order that the bobbin thread should be passed through the bobbin case is indicated by marks around the bobbin case. Be sure to thread the machine as indicated.

Lightly hold down the bobbin with your right hand, and then guide the thread as shown with your left hand.

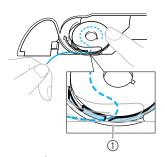

- ① Cutter
- ▶ The cutter cuts the thread.

Note

 Make sure that the thread is correctly inserted through the tension-adjusting spring of the bobbin case. If it is not inserted correctly, reinsert the thread.

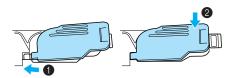

1 Tension-adjusting spring

Reattach the bobbin cover.

Insert the tab in the lower-left corner of the bobbin cover, and then lightly press down on the right side.

▶ The bobbin threading is finished.

Next, thread the upper thread. Continue with the procedure in "Upper Threading" (page 29).

Memo

 You can begin sewing without pulling up the bobbin thread. If you wish to pull up the bobbin thread before starting to sew, pull up the thread according to the procedure in "Pulling up the bobbin thread" (page 36).

Upper Threading

This section describes how to position the spool for the upper thread, and then thread the needle.

CAUTION

• When threading the upper thread, carefully follow the instructions. If the upper threading is not correct, the thread may become tangled or the needle may bend or break.

About the spool of thread

Information about the spools of thread is described below.

CAUTION

• Three spool cap sizes are available, allowing you to choose a spool cap that best fits the size of spool being used. If the spool cap is too small for the spool being used, the thread may catch on the slit in the spool or the needle may break.

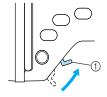

Threading the upper thread

Set the spool of thread on the spool pin, and then thread the machine.

Turn on the sewing machine.

Raise the presser foot lever to raise the presser foot.

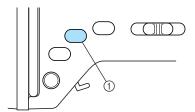

(1) Presser foot lever

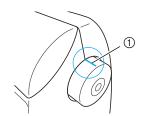

If the presser foot is not raised, the sewing machine cannot be threaded.

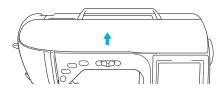

Press (1) (Needle position button) once or twice to raise the needle.

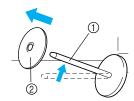

- ① Needle position button
- The needle is correctly raised when the mark on the handwheel is at the top, as shown below. Check the handwheel and, if this mark is not at this position, press (Needle position button) until it is.

- ① Mark on handwheel
- Open the top cover.

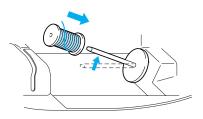

Remove the spool cap that is inserted onto the spool pin.

- ① Spool pin
- ② Spool cap

Place the spool of thread onto the spool pin.
Slide the spool onto the pin so that the spool is horizontal and the thread unwinds to the front at the bottom.

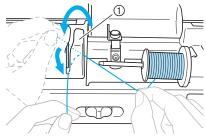

A CAUTION

- If the spool or the spool cap is not positioned correctly, the thread may become tangled around the spool pin or the needle may break.
- Slide the spool cap onto the spool pin.
 Slide the spool cap as far as possible to the right, as shown, with the rounded side on the left.

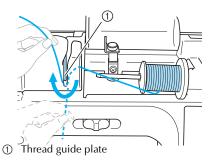

While holding the thread lightly with your right hand, pull the thread with your left hand, and then pass the thread behind the thread guide cover and to the front.

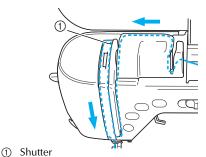

① Thread guide cover

Pass the thread under the thread guide plate, and then pull it up.

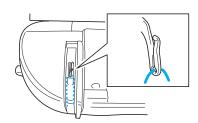

While using your right hand to lightly hold the thread passed under the thread guide plate, pass the thread through the guides in the order shown below.

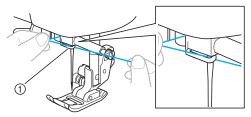

Note

- If the presser foot has been lowered and the shutter is closed, the machine cannot be threaded. Be sure to raise the presser foot and open the shutter before threading the machine. In addition, before removing the upper thread, be sure to raise the presser foot and open the shutter.
- This machine is equipped with a window that allows you to check the position of the take-up lever. Look through this window and check that the thread is correctly fed through the take-up lever.

Pass the thread behind the needle bar thread guide.

The thread can easily be passed behind the needle bar thread guide by holding the thread in your left hand, then feeding the thread with your right hand, as shown.

① Needle bar thread guide

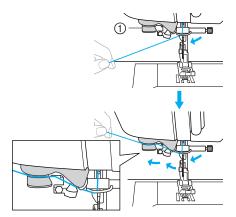

Threading the needle

This section describes how to thread the needle.

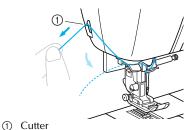

Memo

- The needle threader can be used with sewing machine needles 75/11 through 100/16.
- Thread with a thickness of 130/20 or thicker cannot be used with the needle threader.
- The needle threader cannot be used with the wing needle or the twin needle.
- If the needle threader cannot be used, refer to "Threading the needle manually (without using the needle threader)" (page 33).
- Pull the end of the thread passed through the needle bar thread guide to the left, and then pass the thread through the thread guide disk from the front.

- 1 Thread guide disk
- Cut the thread with the cutter on the left side of the machine.

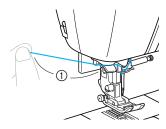

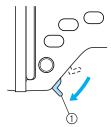

Note

- If the thread is pulled through and cannot be cut correctly, lower the presser foot so that the thread is held in place before cutting the thread. If this operation is performed, skip step 3.
- When using thread that quickly winds off the spool, such as metallic thread, it may be difficult to thread the needle if the thread is cut.

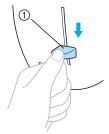

Therefore, instead of using the thread cutter, pull out about 80 mm (approx. 3 inches) of thread after passing it through the thread guide disks (marked "7").

- (1) 80mm or more
- Lower the presser foot lever to lower the presser foot.

- Presser foot lever
- 4 Lower the needle threader lever on the left side of the machine until it clicks, and then slowly return the lever to its original position.

- Needle threader lever
- ➤ The thread is passed through the eye of the needle.

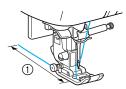

Note

If the needle was not completely threaded, but a loop in the thread was formed in the eye of the needle, carefully pull the loop through the eye of the needle to pull out the end of the thread.

CAUTION

- When pulling out the thread, do not pull it with extreme force, otherwise the needle may break or bend.
- Raise the presser foot lever, pass the end of the thread through the presser foot, and then pull out about 5 cm of thread toward the rear of the machine.

- ① 5 cm
- The upper threading is finished. Now that the upper threading and the lower threading are finished, you are ready to begin sewing.

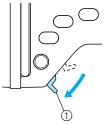

Note

If the needle is not raised, the needle threader cannot thread the needle. Be sure to press (1) (Needle position button) to raise the needle before using the needle threader.

Threading the needle manually (without using the needle threader)

When using special thread, thread with a thickness of 130/20 or thicker, the wing needle or the twin needle which cannot be used with the needle threader. thread the needle as described below.

- Thread the machine to the needle bar thread guide.
 - For details, refer to "Upper Threading" (page
- Lower the presser foot lever.

- 1 Pressor foot lever
- Pass the thread through the eye of the needle from front to back.

Raise the presser foot lever, pass the end of the thread through the presser foot, and then pull out about 5 cm of thread toward the rear of the machine.

Using the twin needle

With the twin needle, you can sew two parallel lines of the same stitch with two different threads. Both upper threads should have the same thickness and quality. Be sure to use the twin needle, the extra spool pin and the spool cap.

For details on the stitches that can be sewn with the twin needle, refer to "Stitch Setting Chart" (page 66).

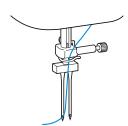

CAUTION

- Only use the twin needle (part code: X59296-151). Use of any other needle may bend the needle or damage the machine.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.
- Install the twin needle.
 - For details on installing a needle, refer to "Replacing the needle" (page 40).
- Thread the upper thread for the left needle eye.
 - For details, refer to steps 1 through 11 of "Threading the upper thread" (page 29).
- Manually thread the left needle with the upper thread.

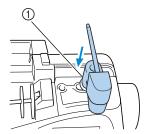

Pass the thread through the eye of the needle from the front.

 The needle threader cannot be used with the twin needle. If the needle threader is used with the twin needle, the sewing machine may be damaged.

Insert the extra spool pin onto the bobbin winder shaft.

Insert the extra spool pin so that it is perpendicular to the bobbin winder shaft.

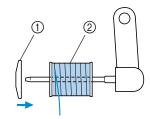

- ① Bobbin winder shaft
- Swing down the spool pin so that it is horizontal.

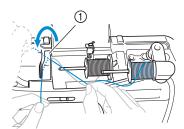

Place the upper thread spool for the needle on the right side onto the extra spool pin, and then secure it with the spool cap.

The thread should unroll from the top front of the spool.

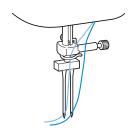

Spool cap
 Spool

Thread the upper thread in the same way that the upper thread for the left side was threaded.

- ① Thread guide cover
- For details, refer to steps (a) through (10) of "Threading the upper thread" (page 30).
- Without passing the thread through the needle bar thread guide, manually thread the right needle.

Pass the thread through the eye of the needle from the front.

• The needle threader cannot be used with the twin needle. If the needle threader is used with the twin needle, the sewing machine may be damaged.

Attach zigzag foot "J".

 For details on changing the presser foot, refer to "Replacing the Presser Foot" (page 42).

CAUTION

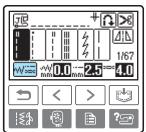

When using the twin needle, be sure to attach zigzag foot "J". If bunched stitches occur, use presser foot "N" or attach stabilizer material.

- Turn on the sewing machine and select a stitch.
 - For stitch selection see "Selecting stitching" (page 49).
 - See "Stitch Setting Chart" (page 66) for stitches that use a twin needle.

CAUTION

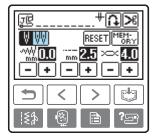

When using the twin needle, be sure to select an appropriate stitch, otherwise the needle may break or the machine may be damaged.

The screen for setting the twin needle appears.

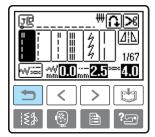

- displays in reverse highlight.

The twin needle can now be used.

Press (Back key).

➤ The initial screen appears again, and ## appears.

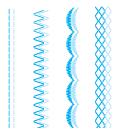

CAUTION

 When using the twin needle, be sure to select the twin needle setting, otherwise the needle may break or the machine may be damaged.

Start sewing.

- For details on starting to sew, refer to "Starting to sew" (page 51).
- ➤ Two lines of stitching are sewn parallel to each other.

Note

When changing the sewing direction, press
 (Needle position button) to raise the needle from the fabric, and then raise the presser foot lever and turn the fabric.

 Do not try turning the fabric with the twin needle left down in the fabric, otherwise the needle may break or the machine may be damaged.

Pulling up the bobbin thread

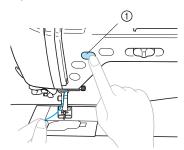

When making gathers or before free-motion quilting, first pull up the bobbin thread as described below.

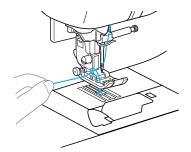

- Refer to steps 1 through 5 of "Installing the bobbin" (page 27).
- Pass the bobbin thread through the slot.
 Do not cut the thread with the cutter.

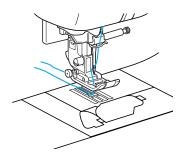

While lightly holding the upper thread with your left hand, press (Needle position button) twice to raise the needle.

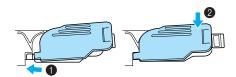

- Needle position button
- ► The bobbin thread is looped around the upper thread and can be pulled up.
- Carefully pull the upper thread upward to pull out the end of the bobbin thread.

Pull out about 10-15 cm (4-5 inches) of the bobbin thread under the presser foot toward the rear of the machine.

Reattach the bobbin cover. Insert the tab in the lower-left corner of the bobbin cover, and then lightly press down on the right side.

Replacing the Needle

This section describes how to replace the needle.

Needle precautions

Be sure to observe the following precautions concerning the handling of the needle. Failure to observe these precautions is extremely dangerous, for example, if the needle breaks and fragments are dispersed. Be sure to read and carefully follow the instructions below.

CAUTION

- Only use home sewing machine needles. Use of any other needle may bend the needle or damage the machine.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.

Needle types and their uses

The sewing machine needle that should be used depends on the fabric and thread thickness. Refer to the following table when choosing the thread and needle appropriate for the fabric that you wish to sew.

Eabric Type	/Application	Thr	Size of Needle			
гарпс туре	Application	Туре	50 60 60 50–80 30–50	Size of Needle		
	Broadcloth	Cotton thread	60.80			
Medium weight fabrics	Taffeta	Synthetic thread	00-80	75/11–90/14		
	Flannel, Gabardine	Silk thread	50			
	Lawn	Cotton thread	60			
Thin fabrics	Georgette	Synthetic thread	60	65/9–75/11		
	Challis, Satin	Silk thread	50–80			
	Denim	Cotton thread	30–50			
Thick fabrics	Corduroy	Synthetic thread	50	90/14–100/16		
	Tweed	Silk thread	30			
Stretch fabrics	Jersey	Thread for knits	50-60	Ball point needle		
Stretch labrics	Tricot	Thread for knits	30-60	(gold colored) 75/11–90/14		
		Cotton thread	50–80			
Easily frag	yed fabrics	Synthetic thread	30-80	65/9–90/14		
			50			
Fo:: 4-:-	atit alain a	Synthetic thread	30	00/14 100/16		
For top-	stitching	Silk thread	30	90/14–100/16		

■ Thread and needle number

The lower the thread number is, the larger the thread, and the larger the needle number, the larger the needle.

■ Ball point needle (gold colored)

To avoid skipped stitches use ball point needles with stretch fabrics.

■ Transparent nylon thread

Use a 90/14 to 100/16 needle, regardless of the fabric or thread.

■ Embroidery needles

Use a 75/11 home sewing machine needle. When embroidering on thick fabrics such as denim, use a 90/14 or 100/16 home sewing machine needle.

• A 75/11 needle is already installed when the sewing machine is purchased.

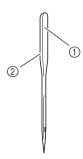

CAUTION

• The appropriate fabric, thread and needle combinations are shown in the table above. If the combination of the fabric. thread and needle is not correct, particularly when sewing thick fabrics (such as denim) with thin needles (such as 65/9 to 75/11), the needle may bend or break. In addition, the stitching may be uneven or puckered or there may be skipped stitches.

Checking the needle

Sewing with a bent needle is extremely dangerous since the needle may break while the machine is being operated.

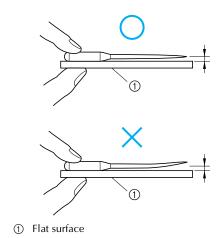

Before using the needle, place the flat side of the needle on a flat surface and check that the distance between the needle and the flat surface is even.

- ① Flat side
- ② Needle type marking

A CAUTION

 If the distance between the needle and the flat surface is not even, the needle is bent. Do not use a bent needle.

Replacing the needle

Replace the needle as described below. Use the screwdriver and a needle that has been determined to be straight according to the instructions in "Checking the needle".

Press (Needle position button) once or twice to raise the needle.

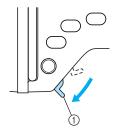

- Needle position button
- Turn off the sewing machine.

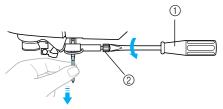

CAUTION

- Before replacing the needle, be sure to turn off the sewing machine, otherwise injuries may occur if (Start/stop button) is accidentally pressed and the machine starts sewing.
- **C** Lower the presser foot lever.

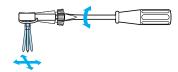

1 Presser foot lever

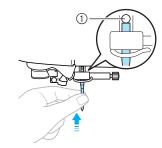

Hold the needle with your left hand, and then use a screwdriver to turn the needle clamp screw toward you (counterclockwise) to remove the needle.

- Screwdriver
- Needle clamp screw
- Do not apply a strong force when loosening or tightening the needle clamp screw, otherwise certain parts of the sewing machine may be damaged.

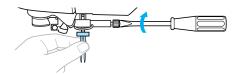

With the flat side of the needle toward the rear of the machine, insert the needle until it touches the needle stopper.

① Needle stopper

While holding the needle with your left hand, use the screwdriver to tighten the needle clamp screw.

Install the twin needle in the same way.

Be sure to insert the needle until it touches the needle stopper and securely tighten the needle clamp screw with the screwdriver, otherwise the needle may break or damage may result.

Replacing the Presser Foot

This section describes how to replace the presser foot.

Presser foot precautions

Be sure to observe the following precautions concerning the presser feet.

CAUTION

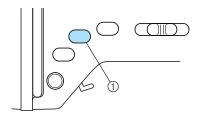

- Use the presser foot appropriate for the type of stitch that you wish to sew, otherwise the needle may hit the presser foot, causing the needle to bend or break.
- Only use presser feet designed specifically for this sewing machine. Use of any other presser foot may result in injuries or damage to the machine.

Replacing the presser foot

Replace the presser foot as described below.

Press (1) (Needle position button) once or twice to raise the needle.

- Needle position button
- Turn off the sewing machine.

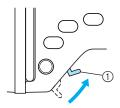

CAUTION

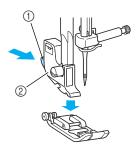

• Before replacing the presser foot, be sure to turn off the sewing machine, otherwise injuries may occur if () (Start/stop button) is accidentally pressed and the machine starts sewing.

Raise the presser foot lever.

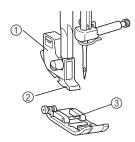

- Presser foot lever
- ▶ The presser foot is raised.
- Press the black button at the back of the presser foot holder.

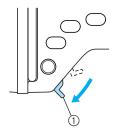

- Black button
- ② Presser foot holder
- The presser foot holder releases the presser foot.

Position the presser foot so the letter indicating the presser foot type (A, G, I, J, M, N or R) is positioned to be read.

- Presser foot holder
- Notch
- ③ Pin
- Slowly lower the presser foot lever so that the presser foot pin snaps into the notch in the presser foot holder.

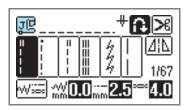

- Presser foot lever
- The presser foot is attached.
- Raise the presser foot lever to check that the presser foot is securely attached.

Note

When a stitch is selected, the icon for the presser foot that should be used appears in the screen. Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, turn off the sewing machine, attach the correct presser foot, and then select the desired stitch again.

Buttonhole foot "A"

GH, Overcasting foot "G"

Zigzag foot "J"

Button fitting foot "M"

Monogramming foot "N"

Blind stitch foot "R"

Side cutter "S"

Embroidery foot "Q"

 For details on the presser foot that should be used with the selected stitch, refer to "Stitch Setting Chart" (page 66).

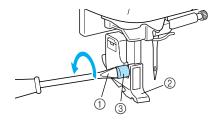

Removing and attaching the presser foot holder

Remove the presser foot holder when cleaning the sewing machine or when installing a presser foot that does not use the presser foot holder, such as the embroidery foot and quilting foot. Use the screwdriver to remove the presser foot holder.

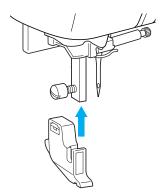

Remove the presser foot.

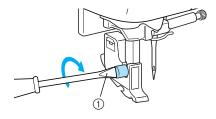

- For details, refer to "Replacing the presser foot" (page 42).
- Use the screwdriver to loosen the presser foot holder screw.

- Screwdriver
- ② Presser foot holder
- ③ Presser foot holder screw
- Attaching the presser foot holder
- Raise the presser foot lever.
- Align the presser foot holder with the lowerleft side of the presser bar.

Hold the presser foot holder in place with your right hand, and then tighten the screw using the screwdriver in your left hand.

① Screwdriver

Note

 If the presser foot holder is not correctly installed, the thread tension will be incorrect.

Sewing Cylindrical Pieces

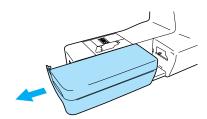

Free-arm sewing makes sewing cylindrical pieces easy.

Free-arm sewing

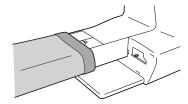

Removing the flat bed attachment allows for free-arm sewing, making it easier to sew cylindrical pieces such as sleeve cuffs and pant legs.

Pull the flat bed attachment off to the left.

- With the flat bed attachment removed, freearm sewing is possible.
- Slide the part that you wish to sew onto the arm, and then sew from the top.

When you are finished with free-arm sewing, install the flat bed attachment back in its original position.

Sewing

Basic sewing operations are described below.

Before operating the sewing machine, read the following precautions.

CAUTION

- While the machine is in operation, pay special attention to the needle location. In addition, keep your hands away from all moving parts such as the needle and handwheel, otherwise injuries may occur.
- Do not pull or push the fabric too hard while sewing, otherwise injuries may occur or the needle may break.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.
- Make sure that the needle does not strike basting pins, otherwise the needle may break or bend.

General sewing procedure

Follow the basic procedures below to sew.

1	Turn on the machine.	Turn on the sewing machine. For details on turning on the machine, refer to "Turning on the machine" (page 17).
		\downarrow
2	Select the stitch.	Select the stitch appropriate for the area to be sewn. For details on selecting a stitch, refer to "Selecting stitching" (page 49).
		↓
3	Attach the presser foot.	Attach the presser foot appropriate for the stitch. For details on replacing the presser foot, refer to "Replacing the presser foot" (page 42).
		↓
4	Position the fabric.	Place the area to be sewn under the presser foot. Be sure that the fabric pieces are sewn in the correct order and that the right and wrong sides of the fabric are aligned correctly. For details on positioning the fabric, refer to "Positioning the fabric" (page 50).
		+
5	Start sewing.	Start sewing. For details on starting to sew, refer to "Starting to sew" (page 51).
		\
6	Cut the thread.	Cut the thread at the end of sewing. For details on cutting the thread, refer to "Cutting the thread" (page 54).

Selecting stitching

Stitches are selected using LCD operations. There are 67 utility stitches. Right after turning the power on, the straight stitch (left needle position) is selected. The machine can also be set to select the straight stitch (center needle position). For details on changing the setting, refer to page 19.

• Refer to "Stitch Setting Chart" (page 66).

Attach the presser foot.

The machine comes with zigzag foot "J" attached.

• For details, refer to "Replacing the presser foot" (page 42).

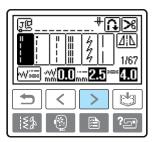

A CAUTION

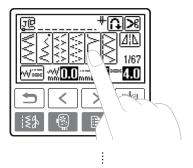

- Use the presser foot appropriate for the stitch. If the wrong presser foot is used, the needle may hit the presser foot and break or bend.
- Turn on the sewing machine.

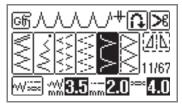

- ▶ The straight stitch (left needle position) is shown selected in the LCD.
- When an animation is displayed on the screen, touch the screen with your finger.

 \square **Example:** ¹¹ \nearrow is selected:

- The stitch is selected, and the stitch number and settings are displayed.
- If necessary, specify the setting for automatic reverse/reinforcement stitching and adjust the stitch length, etc.

Memo

- Uses of stitches and other stitch selections are explained in "UTILITY STITCHES" (page 65).
- Automatic reverse/reinforcement stitching and other settings are explained in "Useful Functions" (page 59).
- The procedures for specifying the thread tension are described in "Adjusting the thread tension" (page 57).
- Procedures for changing the stitch width and length are described in "Adjusting the stitch width" (page 56) and "Adjusting the stitch length" (page 57).

Note

• When a stitch is selected, the icon for the presser foot that should be used appears on the screen. For details, refer to "Replacing the presser foot" (page 42). Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, turn off the sewing machine, attach the correct presser foot, and then select the desired stitch again.

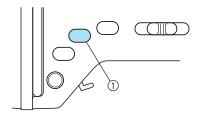

Positioning the fabric

Be sure that the fabric pieces are sewn in the correct order and that the right and wrong sides of the fabric are aligned correctly.

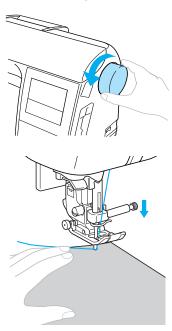

Press (Needle position button) once or twice to raise the needle.

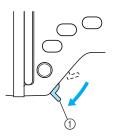

- Needle position button
- Place the fabric under the presser foot.

 If the seam allowance is positioned on the
 - If the seam allowance is positioned on the right side, sewing in a straight line is easier and the extra fabric does not get in the way.

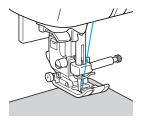

While holding the end of the thread and the fabric with your left hand, turn the handwheel toward you (counterclockwise) with your right hand to lower the needle to the starting point of the stitching.

Lower the presser foot lever.

- (1) Presser foot lever
- ▶ The fabric is now positioned to be sewn.

Starting to sew

Once you are ready to start sewing, you can start the sewing machine. The sewing speed can be adjusted using either the sewing speed controller or the foot controller.

Note

 When the foot controller is plugged in, (Start/stop button) cannot be used to start or stop sewing.

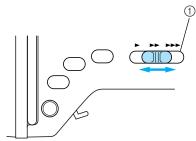

■ Using the operation button

Sewing can be started and stopped using the operation button (*) (Start/stop button).

Slide the sewing speed controller to the left or right to select the desired sewing speed.

Slide the sewing speed controller to the left to sew at a slower speed, or slide the speed

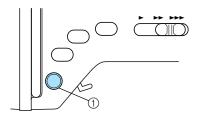

controller to the right to sew at a faster speed.

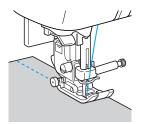

Sewing speed controller

Press (†) (Start/stop button) once.

- ① Start/stop button
- The machine starts sewing.

• If you continue to hold the ① (Start/stop button) pressed immediately after the sewing starts, the machine will sew at a slow speed.

- The machine stops sewing with the needle down (in the fabric).
- When you have finished sewing, press (1) (Needle position button).
 - The needle is raised.

Cut the threads.

 For details, refer to "Cutting the thread" (page 54).

Note

● This machine will automatically stop when the bobbin becomes almost empty. When the machine stops, replace the bobbin thread, and then press (1) (Start/stop button) to begin sewing again.

■ Using the foot controller

Sewing can be started and stopped using the foot controller.

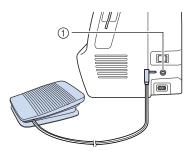

Turn off the sewing machine.

When connecting the foot controller, be sure to turn off the sewing machine in order to prevent the machine from accidentally being started.

Foot controller jack

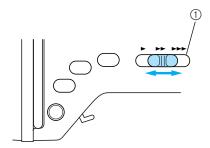

(For U.S.A. only)

- Foot controller: Model T
 This foot controller can be used on this machine model NV1000.
- Turn on the sewing machine.

Slide the sewing speed controller to the left or right to select the desired sewing speed.

Slide the sewing speed controller to the left to sew at a slower speed, or slide the speed controller to the right to sew at a faster speed.

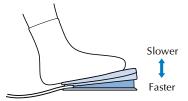

- Sewing speed controller
- The speed set using the sewing speed controller is the foot controller's maximum sewing speed.

Once you are ready to start sewing, slowly

press down on the foot controller.

Pressing down on the foot controller increases the sewing speed; releasing the pressure on the foot controller decreases the sewing speed.

- Slowly press down on the foot controller.
 Pressing it down hard starts sewing too quickly.
- The machine starts sewing.
- When the end of the stitching is reached, completely release the foot controller.
 - The machine stops sewing with the needle lowered (in the fabric).
- When you have finished sewing, press (1) (Needle position button).
 - The needle is raised.
- Cut the threads.
 - For details, refer to "Cutting the thread" (page 54).

Memo

- When the foot controller is plugged in, (start/stop button) cannot be used to start or stop sewing.
- When sewing is stopped, the needle remains lowered (in the fabric). The machine can be set so that the needle will stay up when sewing is stopped. For details on setting the machine so that the needle stays up when sewing is stopped, refer to "Changing the machine settings" (page 19).

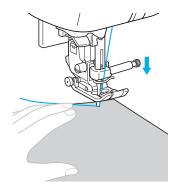

A CAUTION

- Do not allow thread or dust to accumulate in the foot controller, otherwise a fire or an electric shock may occur.
- Do not place objects on the foot controller, otherwise damage to the machine or injuries may occur.
- If the machine is not to be used for a long period of time, unplug the foot controller, otherwise a fire or an electric shock may occur.

Securing the stitching

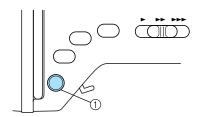

When sewing with the straight stitch, for example, at the end of an opening or where seams do not overlap, use reverse stitching or reinforcement stitching to secure the end of the thread.

Lower the needle into the fabric at the beginning of the stitching, and then lower the presser foot lever.

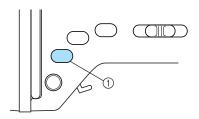

Press () (Start/stop button) or press down on the foot controller.

At this time, if (Start/stop button) is held down, the machine sews at a slow speed.

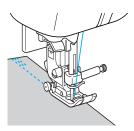

- Start/stop button
- For details, refer to "Starting to sew" (page 51)
- The machine starts sewing.
- After sewing 3 to 5 stitches, press (Reverse/reinforcement stitch button).

 Keep (Reverse/reinforcement stitch button) held down until you reach the beginning of the stitching.
 - The machine sews at a slow speed when (Reverse/reinforcement stitch button) is held down.

- ① Reverse/reinforcement stitch button
- While (Reverse/reinforcement stitch button) is held down, reverse stitches are sewn.
- After sewing back to the beginning of the stitching, release (Reverse/reinforcement stitch button).
 - ▶ The machine stops sewing.
- Press (Start/stop button), or press down on the foot controller.
 - ➤ The machine starts sewing in the normal sewing direction.

- When the end of the stitching is reached, press (Reverse/reinforcement stitch button). Keep (Reverse/reinforcement stitch button) held down until 3 to 5 reverse stitches are sewn.
 - While (A) (Reverse/reinforcement stitch button) is held down, reverse stitches are sewn.

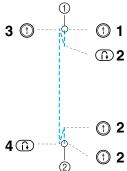

- After 3 to 5 reverse stitches have been sewn, release (i) (Reverse/reinforcement stitch button).
 - The machine stops sewing.
- Press (1) (Start/stop button), or press down on the foot controller.

At this time, if (Start/stop button) is held down, the machine sews at a slow speed.

- The machine starts sewing in the normal sewing direction.
- After sewing to the end of the stitching, the sewing machine stops.

Release (1) (Start/stop button) or foot controller.

- ① Beginning of stitching
- ② End of stitching

■ Sewing stitches

Reverse stitches are set for the 1 and 7 and 7 and 8 stitches.

When (Reverse/reinforcement stitch button) is pressed with stitches other than these, reinforcement stitches are used. Reinforcement stitches are 3 to 5 stitches sewn on top of each other in one place.

- Reverse stitching
 Reinforcement stitching
- 2) Keimorcement stitch

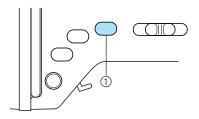

Memo

 The sewing machine can be set to automatically sew reverse or reinforcement stitches at the beginning and end of the stitching. For details, refer to "Automatically sewing reverse/ reinforcement stitches" (page 59).

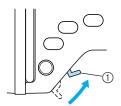

Cutting the thread

When you have finished sewing, cut the threads.

- Using the thread cutter button
- When you wish to finish the stitching, press (Thread cutter button) once.

- Thread cutter button
- The threads are cut and the needle is raised.
- Raise the presser foot lever, then remove the fabric.

(1) Presser foot lever

CAUTION

- Do not press ⋈ (Thread cutter button) after threads have already been cut, otherwise the needle may break, the threads may become tangled or damage to the machine may occur.
- Do not press ⊗ (Thread cutter button) if there is no fabric under the presser foot or while the machine is sewing, otherwise damage to the machine may occur.

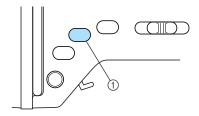

Memo

 The machine can be set so that the threads will be cut when sewing is finished. For details on setting the machine so that the threads are cut automatically, refer to "Automatically cutting the thread" (page 60).

■ Using the thread cutter

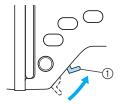

When sewing with thread thicker than #30, nylon or metallic threads, or other special threads, use the thread cutter on the side of the machine to cut the threads.

When you wish to finish the stitching and the sewing machine is stopped, press (Needle position button) once to raise the needle.

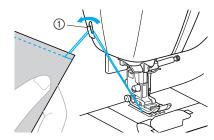

- Needle position button
- ▶ The needle is raised.

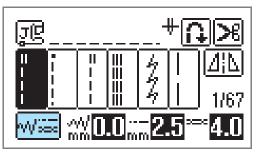

- ① Presser foot lever
- Pull the fabric to the left side of the machine, and then pass the threads through the thread cutter to cut them.

1 Thread cutter

Setting the Stitch

This machine is preset with the default settings for the stitch width, stitch length, and upper thread tension for each stitch. However, you can change any of the settings by pressing in the screen, then following the procedure described in this section.

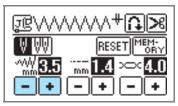

Note

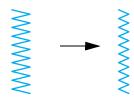

- Settings for some stitches cannot be changed. For details, refer to "Stitch Setting Chart" (page 66).
- Stitch settings return to their defaults if they are changed, when the machine is turned off or a different stitch is selected before the stitch setting is saved.

Adjusting the stitch width

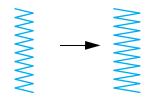

The stitch width (zigzag width) can be adjusted to make the stitch wider or narrower.

Each press of **—** makes the zigzag stitch narrower.

Each press of + makes the zigzag stitch wider.

Memo

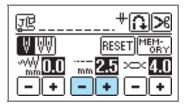

- Press RESET to return the setting to its default.
- If the straight stitch (left needle position or triple stretch stitch) was selected, changing the stitch width changes the needle position. Increasing the width moves the needle to the right; reducing the width moves the needle to the left.
- The sewing machine can be set so that the stitch width can easily be changed with the sewing speed controller. For details, refer to "Satin stitching" (page 102).
- means the setting cannot be adjusted.

 After adjusting the stitch width, slowly turn the handwheel toward you (counterclockwise) and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.

Adjusting the stitch length

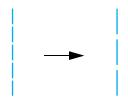

The stitch length can be adjusted to make the stitch coarser or finer.

Each press of **| - |** makes the stitch finer (shorter).

Each press of \blacksquare makes the stitch coarser (longer).

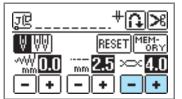

- Press RESET to return the setting to its default.
- means the setting cannot be adjusted.

CAUTION

• If the stitches are bunched together, increase the stitch length. Continuing to sew with the stitches bunched together may result in the needle bending or breaking.

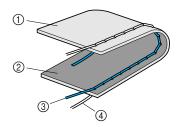

Adjusting the thread tension

You may need to change the thread tension, depending on the fabric and thread being used.

■ Correct thread tension

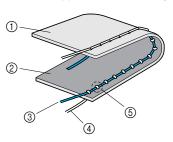

The upper thread and the bobbin thread should cross near the center of the fabric. Only the upper thread should be visible from the right side of the fabric, and only the bobbin thread should be visible from the wrong side of the fabric.

- (1) Wrong side of fabric
- ② Right side of fabric
- Upper thread
- Bobbin thread

■ Upper thread is too tight

If the bobbin thread is visible from the right side of the fabric, the upper thread is too tight.

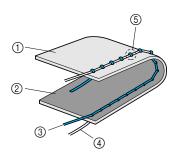

- Wrong side of fabric
- Right side of fabric
- ③ Upper thread
- Bobbin thread
- The bobbin thread is visible from the right side of the fabric.

Each press of **–** makes the thread tension looser.

■ Upper thread is too loose

If the upper thread is visible from the wrong side of the fabric, the upper thread is too loose.

- Wrong side of fabric
 Right side of fabric
- ③ Upper thread
- Bobbin thread
- The upper thread is visible from the wrong side of the fabric.

Each press of + makes the thread tension tighter.

Press RESET to return the setting to its default.

Useful Functions

Functions useful in improving sewing efficiency are described below.

Automatically sewing reverse/ reinforcement stitches

The sewing machine can be set to automatically sew reverse or reinforcement stitches at the beginning and end of the stitching. Whether reverse stitches or reinforcement stitches are sewn depends on the stitch that is selected. For details, refer to "Stitch Setting Chart" (page 66).

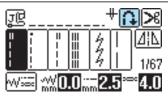

Turn on the sewing machine.

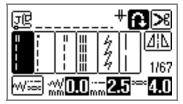

- ▶ The LCD comes on.
- Select a stitch.
 - · For details on selecting a stitch, refer to "Selecting stitching" (page 49).

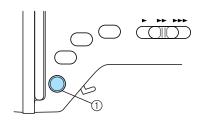

It turns to 1, and the sewing machine is set for automatic reverse/reinforcement stitching.

- To turn automatic reverse/reinforcement stitching off, press 🔃.
- When the sewing machine is turned off, the automatic reverse/reinforcement stitching setting is cancelled.

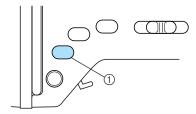

Position the fabric under the presser foot, and then press (1) (Start/stop button) once.

- (1) Start/stop button
- ➤ After reverse/reinforcement stitches are sewn, the machine starts sewing.
- After reaching the end of the stitching, press (1) (Reverse/reinforcement stitch button) once.

This step is not necessary if a stitch such as those for sewing buttonholes and bar tacks is selected where reinforcement stitches are automatically sewn.

- (1) Reverse/reinforcement stitch button
- ▶ After reverse/reinforcement stitches are sewn, the sewing machine stops.

 Reverse/reinforcement stitches will not be sewn if (1) (Start/stop button) is pressed at the end of the stitching. Be sure to press (1) (Reverse/reinforcement stitch button) at the end of the stitching.

Automatically cutting the thread

The sewing machine can be set to automatically cut the threads at the end of the stitching. This is called "programmed thread-cutting". If programmed thread-cutting is set, automatic reverse/reinforcement stitching is also set.

Turn on the sewing machine.

▶ The LCD comes on.

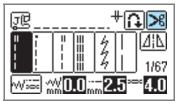

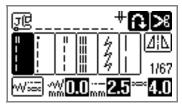

Select a stitch.

• For details on selecting a stitch, refer to "Selecting stitching" (page 49).

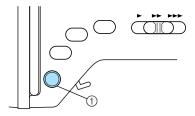

Press Mon the screen.

To turn programmed thread cutting off, press
 ▶8.

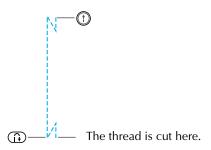

Set the fabric in place, and press (1) (Start/stop button) once.

- ① Start/stop button
- Stitching starts after reverse stitching or reinforcement stitching.
- Once you have reached the end of the stitching, press (Reverse/reinforcement stitch button) once.

If stitching, such as buttonholes and bar tacking, that includes reinforcement stitching has been selected, this operation is unnecessary.

➤ After the reverse stitching or reinforcement stitching has been done, the sewing machine stops, and the thread is cut.

Memo

- Programmed thread-cutting will not be performed if (Start/stop button) is pressed while sewing. Press (Reverse/ reinforcement stitch button) at the end of the stitching.
- If the power is turned off, programmed thread-cutting will be turned off.

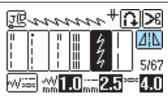

Mirroring stitches

You can sew the mirror image of a stitch horizontally (left and right).

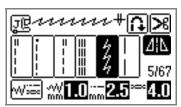

- The LCD comes on.
- Select a stitch.
 - · For details on selecting a stitch, refer to "Selecting stitching" (page 49).
- Press **¼** on the screen.

■ For stitches other than utility stitches

It turns to <a>\overline{1}
\(\overline{1}\)
\(\overline

• To turn the mirrored stitching off, press

- Mirroring is not possible for buttonholes and other stitches where [A] shows.
- When the sewing machine is turned off, the mirroring setting is cancelled.

Useful Sewing Tips

Various ways to achieve better results for your sewing projects are described below. Refer to these tips when sewing your project.

Trial sewing

After you have set up the machine with the thread and needle appropriate for the type of fabric being sewn, the machine automatically sets the thread tension and stitch length and width for the stitch that is selected. However, a trial piece of fabric should be sewn since, depending on the type of fabric and stitching being sewn, the desired results may not be achieved.

For the trial sewing, use a piece of fabric and thread that are the same as those used for your project, and check the thread tension and stitch length and width. Since the results differ depending on the type of stitching and the number of layers of fabric sewn, perform the trial sewing under the same conditions that will be used with your project.

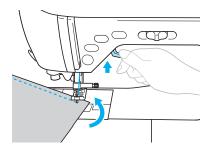

Changing the sewing direction

Leave the needle lowered (in the fabric). If the needle remained up when the machine stopped sewing, press (1) (Needle position button) to lower the needle.

Raise the presser foot lever, and then turn the fabric.

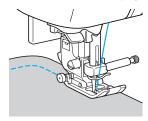

Turn the fabric using the needle as a pivot.

Lower the presser foot lever and continue sewing.

Sewing curves

Stop sewing, and then slightly change the sewing direction to sew around the curve. For details on sewing with an even seam allowance, refer to "Sewing an even seam allowance" (page 64).

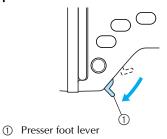

When sewing along a curve while using a zigzag stitch, select a shorter stitch length in order to obtain a finer stitch.

Adjusting the presser foot pressure

For best results when sewing stretch fabrics, thin fabrics or thick fabrics, adjust the presser foot pressure (amount of pressure that the presser foot applies to the fabric).

Lower the presser foot lever to lower the presser foot.

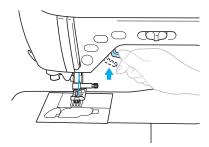

The presser foot pressure can be set to one of four levels (between 1 and 4). The larger the setting, the stronger the pressure. Use setting 1 or 2 for thick fabrics, use setting 4 for thinner fabrics.

When you are finished sewing, reset the dial to 3 (standard).

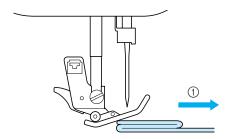

Sewing thick fabrics

■ If the fabric does not fit under the presser foot If the fabric does not fit easily under the presser foot, raise the presser foot lever even higher to bring the presser foot to its highest position.

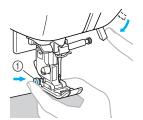

■ If thick seams are being sewn and the fabric does not feed at the beginning of stitching

Zigzag foot "J" is equipped with a feature that keeps the presser foot level.

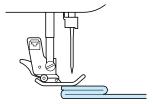

Sewing direction

- When you encounter a seam that is too thick to feed under the foot, raise the presser foot lever.
- Press the black button (presser foot holding pin) on the left side of zigzag foot "J". Keep the button held in and lower the presser foot.

- ① Presser foot holding pin
- Release the button. The foot will lock in place level with the seam, allowing the fabric to feed.

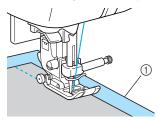

Once the trouble spot has been passed, the foot will return to its normal position.

CAUTION

• If fabric more than 6 mm (15/64 inch) thick is sewn or if the fabric is pushed with too much force, the needle may bend or break.

Sewing thin fabrics

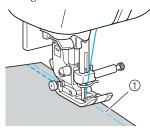

When sewing thin fabrics, the stitching may become misaligned or the fabric may not feed correctly. If this occurs, place thin paper or stabilizer material under the fabric and sew it together with the fabric. When you have finished sewing, tear off any excess paper.

① Stabilizer material or paper

Sewing stretch fabrics

First, baste the pieces of fabric together, and then sew without stretching the fabric.

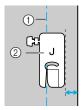

Basting

Besides, using the stretch stitching or the thread for knits gives an attractive finishes.

Sewing an even seam allowance

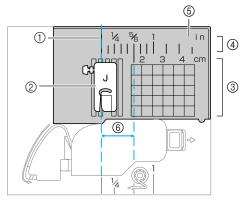

To sew an even seam, start sewing so that the seam allowance is to the right of the presser foot, and the edge of the fabric is aligned with either the right edge of the presser foot or a marking on the needle plate.

■ Aligning the fabric with the presser foot Sew while keeping the right edge of the presser foot a fixed distance from the edge of the fabric.

- (1) Seam
- Presser foot
- Aligning the fabric with a needle plate marking

The markings on the needle plate show the distance from the needle position of a seam sewn with the straight stitch (left needle position). Sew while keeping the edge of the fabric aligned with a marking in the needle plate. The distance between the markings in the upper scale is 1/8 inch (3 mm) and the distance between the markings in the grid is 5 mm (3/16 inch).

- Seam
- ② Presser foot
 - Centimeters
- 4 Inches
- Needle plate
- 6) 16 mm (5/8 inch)

UTILITY STITCHES

The various stitches and their applications are described in this chapter.

Selecting Stitching

This section provides details on the various types of stitches available and the procedure for selecting a stitch.

Stitch types

A stitch can be selected from the following types available.

For details on the various stitches, refer to "Stitch Setting Chart" (page 66).

① Utility stitches

You can select from 67 utility stitches, including straight line stitching, overcasting, button holes and basic decorative stitches. If this is selected, the utility stitch selection appears right after the power is turned on.

Decorative stitches

(Can be combined) You can select from 31 decorative stitches. including leaves, flowers and hearts. You can sew combinations of multiple decorative stitches.

③ Satin stitches (Can be combined)

You can select from 16 satin stitches. You can sew combinations of multiple decorative stitches.

4 My Custom Stitch You can design original stitches. (For details, refer to "Designing a Pattern (My Custom Stitch)" (page 124).)

⑤ Cross stitches (Can be combined)

You can select from 14 cross stitches. You can sew combinations of multiple decorative stitches.

⑥ Combined utility stitches | § (Can be combined) You can sew with combinations from 39 utility stitches.

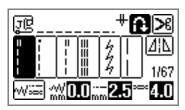

7) Patterns stored in the machine's memory You can recall a stored pattern.

Selecting stitching

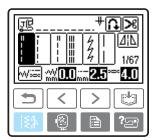

Turn on the sewing machine.

- When an animation is displayed on the screen, touch the screen with your finger.
- The straight stitch (left needle position) is shown selected on the screen.

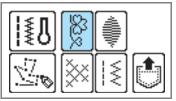

Press [18] (Utility stitch key) on the operation panel.

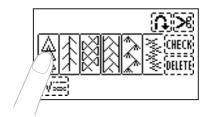

The screen containing the various types of stitches appears.

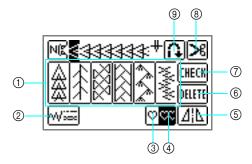

- The screen containing the various stitches in the selected stitch type appears.
- To select a different stitch type, press ((Back key).

- 4
- Press the stitch selection.
- (Previous page key) displays the previous screen, and (Next page key) displays the next screen.
- ☐ When a decorative stitch is selected

- ① Decorative stitch selection
- Set width, length and tension
- ③ Single stitch sewing
- 4 Repeat sewing
- (5) Horizontal mirror image
- 6 Delete a selected pattern
- Check combined pattern
- (8) Automatic thread cutting
- Automatic reverse/reinforcement stitch
- To select a different stitch, press **DELETE** to remove the selected pattern.
- If necessary, specify the setting for automatic reverse/reinforcement stitching and adjust the stitch length, etc.
 - For details on sewing with each of the utility stitches, refer to the following pages.

Note

• When a stitch is selected, the icon for the presser foot that should be used appears on the screen. Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, turn off the sewing machine, attach the correct presser foot, and then select the desired stitch again.

Memo

 For details on adjusting the stitch width and length, refer to "Adjusting the stitch width" (page 56) and "Adjusting the stitch length" (page 57).

Saving stitch settings

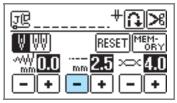

This machine is preset with the default settings for the stitch width (zigzag width), stitch length, thread tension, programmed thread cutting, and automatic reverse/reinforcement stitching for each stitch. However, if you wish to save specific settings for a stitch so that they can be used later, press [MEM-ORY] after changing the settings to save the new settings with the selected stitch.

This feature can be used only with utility stitches.

- To use a stitch length of 2.0 mm for the straight stitch
- Select a straight stitch.
- Press ₩ .

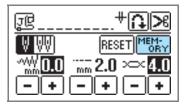

- The default stitch length is 2.5 mm.
- Set the stitch length to 2.0 mm.

Press MEM-ORY.

• To reset the selected stitch pattern to its default settings, press RESET, and then press MEM-ORY ·

The confirmation message is displayed.

Press OK. 5

Note

- The next time that the same straight stitch is selected, the stitch length is set to 2.0 mm.
- All stitch settings (stitch width (zigzag width), stitch length, thread tension, programmed thread cutting, and automatic reverse/reinforcement stitching, etc.) are saved, not just the setting that was changed. When the same stitch pattern is selected, the last settings saved are displayed even if the machine was turned off. If the settings are changed again and MENT is pressed, or if **RESET** is pressed to reset the setting to its default, the new settings are not saved unless MEM- is pressed another time.

Even if **RESET** is pressed, the settings for programmed thread cutting and automatic reverse/reinforcement stitching cannot be reset.

Overcasting Stitches

Sew overcasting stitches along the edges of cut fabric to prevent them from fraying. 15 stitches are available for overcasting. The procedure for sewing overcasting stitch is explained according to the presser foot that is used.

Sewing overcasting stitches using overcasting foot "G"

Three stitches can be used to sew overcasting with overcasting foot "G".

Stitch Name	Pattern	Application	Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser Foot
			Auto	Manual	Auto	Manual	1001
Overcasting stitch	11	Preventing fraying in medium weight and thin fabrics	3.5 (1/8)	2.5–5.0 (3/32–3/16)	2.0 (1/16)	1.0–4.0 (1/16–3/16)	
	12	Preventing fraying in thick fabrics and fabrics that fray easily	5.0 (3/16)	2.5–5.0 (3/32–3/16)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	G
	13		5.0 (3/16)	3.5–5.0 (1/8–3/16)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	

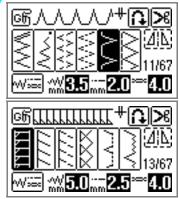

Attach overcasting foot "G".

• For details, refer to "Replacing the presser foot" (page 42).

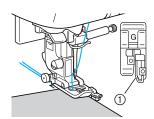

Select a stitch.

• For details, refer to "Selecting stitching" (page 49).

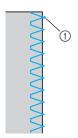

Position the fabric with the edge of the fabric against the guide of the presser foot, and then lower the presser foot lever.

① Guide

Sew with the edge of the fabric against the presser foot guide.

Needle drop point

Sewing overcasting stitches using zigzag foot "J"

Seven stitches can be used to sew overcasting stitches with zigzag foot "J".

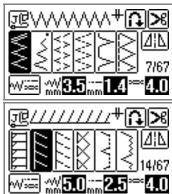

Stitch Name	Pattern Application		Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser Foot
			Auto	Manual	Auto	Manual	FOOL
Zigzag stitch (center needle position)	⁷	Preventing fraying (center baseline/reverse stitching)	3.5 (1/8)	0.0–7.0 (0–1/4)	1.4 (1/16)	0.0–4.0 (0–3/16)	
Zigzag stitch (right needle position)	8	Preventing fraying (right baseline/reinforcement stitching)	3.5 (1/8)	2.5–5.0 (3/32–3/16)	1.4 (1/16)	0.3–4.0 (1/64–3/16)	
2-point zigzag stitch	9	reventing traying in thick	5.0 (3/16)	1.5–7.0 (1/16–1/4)	1.0 (1/16)	0.2–4.0 (1/64–3/16)	
3-point zigzag stitch	10	fabrics and stretch fabrics	5.0 (3/16)	1.5–7.0 (1/16–1/4)	1.0 (1/16)	0.2–4.0 (1/64–3/16)	,
	14	Preventing fraying in stretch fabrics	5.0 (3/16)	0.0–7.0 (0–1/4)	2.5 (3/32)	0.5–4.0 (1/32–3/16)	
Overcasting stitch	15	Preventing fraying in thick fabrics and stretch fabrics	5.0 (3/16)	0.0–7.0 (0–1/4)	2.5 (3/32)	0.5–4.0 (1/32–3/16)	
	16	Preventing fraying in stretch fabrics	4.0 (3/16)	0.0–7.0 (0–1/4)	4.0 (3/16)	1.0–4.0 (1/16–3/16)	

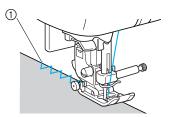

• For details, refer to "Replacing the presser foot" (page 42).

Select a stitch.

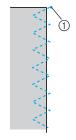

• For details, refer to "Selecting stitching" (page

Sew along the edge of the fabric with the needle dropping off the edge at the right.

① Needle drop point

① Needle drop point

Sewing overcasting stitches using the optional side cutter

Using the optional side cutter, seam allowances can be finished while the edge of the fabric is cut off. Five stitches can be used to sew overcasting stitches with the side cutter.

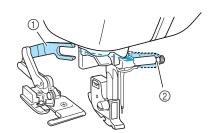

Note

• Thread the needle manually when using the side cutter, or only attach the side cutter after threading the needle using the needle threader.

Stitch Name	Pattern	ttern Application	Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser Foot
			Auto	Manual	Auto	Manual	FOOL
Side Cutter	63 ! s	Sewing straight stitches while cutting the fabric	0.0 (0)	0.0–2.5 (0–3/32)	2.5 (3/32)	0.2–5.0 (1/64–3/16)	
	64	Sewing zigzag stitches while cutting the fabric	3.5 (1/8)	3.5–5.0 (1/8–3/16)	1.4 (1/16)	0.0–4.0 (0–3/16)	
	65	Preventing fraying in thin and mediumweight fabrics while cutting the fabric	3.5 (1/8)	3.5–5.0 (1/8–3/16)	2.0 (1/16)	1.0–4.0 (1/16–3/16)	S
	66	Preventing fraying in thick fabrics while cutting the fabric	5.0 (3/16)	3.5–5.0 (1/8–3/16)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
	67	Preventing fraying in thick fabrics while cutting the fabric	5.0 (3/16)	3.5–5.0 (1/8–3/16)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	

- Remove the presser foot.
 - For details, refer to "Replacing the presser foot" (page 42).
- Hook the connecting fork of the side cutter onto the needle clamp screw.

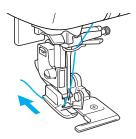

Connecting fork
 Needle clamp screw

Position the side cutter so that side cutter pin is aligned with the notch in the presser foot holder, and then slowly lower the presser foot lever.

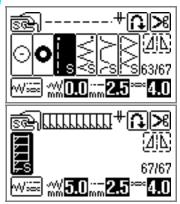

- ① Notch in presser foot holder
- ② Pin
- The side cutter is attached.

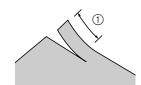

- Raise the presser foot lever to check that the side cutter is securely attached.
- Pass the upper thread under the side cutter, and then pull it out toward the rear of the sewing machine.

Select a stitch.

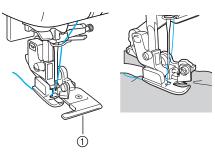

- For details, refer to "Selecting stitching" (page 49).
- Make a cut of about 2 cm (3/4 inch) long in the fabric at the beginning of the stitching.

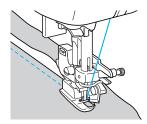

(1) 2 cm (3/4 inch)

Position the fabric in the side cutter.

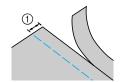

The cut in the fabric should be positioned over the guide plate of the side cutter.

- (1) Guide plate
- If the fabric is not positioned correctly, the fabric will not be cut.
- Lower the presser foot lever, and then start sewing.

- A seam allowance is cut while the stitching is sewn.
- If the stitching is sewn in a straight line ⁶³ the seam allowance will be about 5 mm (3/16 inch).

① 5 mm (3/16 inch)

Memo

- The side cutter can cut as much as one layer of 13-oz. denim.
- After using the side cutter, clean it by removing any lint or dust.
- If the side cutter can no longer cut fabric, use a rag to apply a small amount of oil to the cutting edge of the cutter.

Basic Stitching

Straight stitches are used for sewing plain seams. Five stitches are available for basic stitching.

Stitch Name	Pattern	tern Application	Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser Foot
			Auto	Manual	Auto	Manual	1001
Basting stitch	6	Temporarily securing	0.0 (0)	0.0–7.0 (0–1/4)	-	-	
Straight stitch (left needle	1	Basic stitching and sewing gathers or pintucks (left baseline/ reverse stitching)	0.0 (0)	0.0–7.0 (0–1/4)	2.5 (3/32)	0.2–5.0 (1/64–3/16)	
position)	2	Basic stitching and sewing gathers or pintucks (left baseline/reinforcement stitching)	0.0 (0)	0.0–7.0 (0–1/4)	2.5 (3/32)	0.2–5.0 (1/64–3/16)	J
Straight stitch (center needle position)	3	Basic stitching and sewing gathers or pintucks (center baseline/reverse stitching)	3.5 (1/8)	0.0–7.0 (0–1/4)	2.5 (3/32)	0.2–5.0 (1/64–3/16)	
Triple stretch stitch	4	Reinforcing seams and sewing stretch fabrics	0.0 (0)	0.0-7.0 (0-1/4)	2.5 (3/32)	1.5–4.0 (1/16–3/16)	

Basting

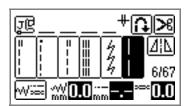

Sew basting with a stitch length between 5 mm (3/16 inch).

• For details, refer to "Replacing the presser foot" (page 42).

• For details, refer to "Selecting stitching" (page 49).

Start sewing.

• For details, refer to "Starting to sew" (page 51).

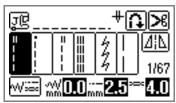

Basic stitching

- Baste or pin together the fabric pieces.
- Attach zigzag foot "J".

• For details, refer to "Replacing the presser foot" (page 42).

Select a stitch.

- For details, refer to "Selecting stitching" (page 49).
- 4 Lower the needle into the fabric at the beginning of the stitching.

Start sewing.

- For details, refer to "Starting to sew" (page
- For details on sewing reverse/reinforcement stitches, refer to "Securing the stitching" (page

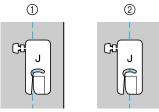

When sewing is finished, cut the thread.

• For details, refer to "Cutting the thread" (page 54).

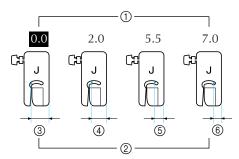

Changing the needle position

The needle position used as the baseline is different for the straight stitch (left needle position) and the straight stitch (center needle position).

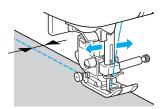

Straight stitch (left needle position) Straight stitch (center needle position)

When the stitch width of the straight stitch (left needle position) is set to its standard setting (0.0 mm), the distance from the needle position to the right side of the presser foot is 12 mm (1/2 inch). If the stitch width is changed (between 0 and 7.0 mm (1/4 inch)), the needle position will also change. By changing the stitch width and sewing with the right side of the presser foot aligned with the edge of the fabric, a seam allowance can be sewn with a fixed width.

- Stitch width setting
 - Distance from the needle position to the right side of the presser foot
- 12.0 mm (1/2 inch)
- (4) 10.0 mm (3/8 inch)
- ⑤ 6.5 mm (1/4 inch)
- ⑥ 5.0 mm (3/16 inch)

• For details, refer to "Adjusting the stitch width" (page 56).

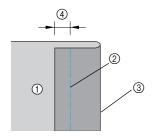

Blind Hem Stitching

Secure the bottoms of skirts and pants with a blind hem. Two stitches are available for blind hem stitching.

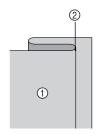

Stitch Name	Pattern Application		Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser Foot
			Auto	Manual	Auto	Manual	1001
Blind hem stitch	17	Blind hem stitching on mediumweight fabrics	00	3←-→3	2.0 (1/16)	1.0–3.5 (1/16–1/8)	R
	18	Blind hem stitching on stretch fabrics	00	3←-→3	2.0 (1/16)	1.0–3.5 (1/16–1/8)	K

Sew a blind hem according to the following procedure.

Fold the fabric along the desired edge of the hem, and then baste it about 5 mm (3/16 inch) from the edge of the fabric.

- ① Wrong side of fabric
- ② Basting stitching
- ③ Desired edge of hem
- ④ 5 mm (3/16 inch)
- Fold back the fabric along the basting, and then position the fabric with the wrong side facing up.

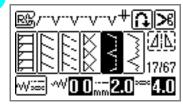

- ① Wrong side of fabric
- ② Basting

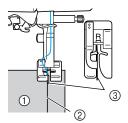

- For details, refer to "Replacing the presser foot" (page 42).
- Select a stitch.

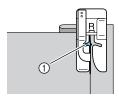

- For details, refer to "Selecting stitching" (page 49).
- Position the fabric with the edge of the folded hem against the guide of the presser foot, and then lower the presser foot lever.

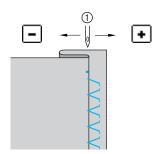

- ① Wrong side of fabric
- 2) Fold of hem
- ③ Guide

Adjust the stitch width until the needle slightly catches the fold of the hem.

Needle drop point

When you change the needle drop point, raise the needle, and then change the stitch width.

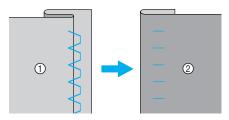

① Stitch width

hem.

■ If the needle catches too much of the hem fold

The needle is too far to the left. Press • to decrease the stitch width so that the needle slightly catches the fold of the

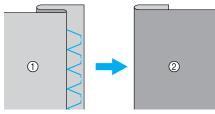

- ① Wrong side of fabric
- Right side of fabric

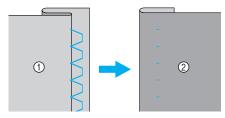

■ If the needle does not catch the hem fold

The needle is too far to the right.

Press **–** to increase the stitch width so that the needle slightly catches the fold of the

- ① Wrong side of fabric Right side of fabric
- For details, refer to "Adjusting the stitch width" (page 56).
- Sew with the fold of the hem against the presser foot guide.
- Remove the basting stitching.

- Wrong side of fabric
- Right side of fabric

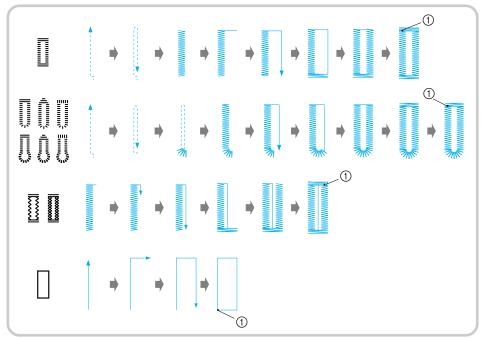

Buttonhole Stitching

Buttonholes can be sewn and buttons can be sewn on. 10 stitches are available for sewing one-step buttonholes, one for sewing on buttons.

Stitch Name	Pattern	Application		ch Width n (inch)]		ch Length m (inch)]	Presser Foot
			Auto	Manual	Auto	Manual	1001
	48	Horizontal buttonholes on thin and mediumweight fabrics	5.0 (3/16)	3.0–5.0 (1/8–3/16)	0.4 (1/64)	0.2–1.0 (1/64–1/16)	
	49	Horizontal buttonholes on areas that are subject to strain	5.0 (3/16)	3.0–5.0 (1/8–3/16)	0.4 (1/64)	0.2–1.0 (1/64–1/16)	
·	50	Horizontal buttonholes on thick fabrics	5.0 (3/16)	3.0–5.0 (1/8–3/16)	0.4 (1/64)	0.2–1.0 (1/64–1/16)	
·	51	Buttonholes with bar tacks on both ends for stabilized fabrics	5.0 (3/16)	3.0–5.0 (1/8–3/16)	0.4 (1/64)	0.2–1.0 (1/64–1/16)	A
Buttonhole	52	Buttonholes for stretch or knit fabrics	6.0 (15/64)	3.0–6.0 (1/8–15/64)	1.0 (1/16)	0.5–2.0 (1/32–1/16)	
stitch	53	Buttonholes for stretch fabrics	6.0 (15/64)	3.0–6.0 (1/8–15/64)	1.5 (1/16)	1.0–3.0 (1/16–1/8)	
	54	Bound buttonholes	5.0 (3/16)	0.0–6.0 (0–15/64)	2.0 (1/16)	0.2–4.0 (1/64–3/16)	
	⁵⁵	Keyhole buttonholes for thick or plush fabrics	7.0 (1/4)	3.0–7.0 (1/8–1/4)	0.5 (1/32)	0.3–1.0 (1/64–1/16)	
	⁵⁶	Keyhole buttonholes for mediumweight and thick fabrics	7.0 (1/4)	3.0–7.0 (1/8–1/4)	0.5 (1/32)	0.3–1.0 (1/64–1/16)	
	⁵⁷	Horizontal buttonhole for thick or plush fabrics	7.0 (1/4)	3.0–7.0 (1/8–1/4)	0.5 (1/32)	0.3–1.0 (1/64–1/16)	
Button- sewing stitch	61 🖸	Button sewing	3.5 (1/8)	2.5–4.5 (3/32–3/16)	_	_	М

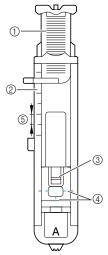

Buttonhole sewing

The maximum buttonhole length is about 28 mm (1-1/8 inches) (diameter + thickness of the button). Buttonholes are sewn from the front of the presser foot to the back, as shown below.

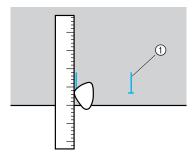

Reinforcement stitching

The names of parts of buttonhole foot "A", which is used for sewing buttonholes, are indicated below.

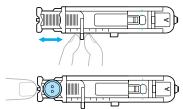

- Button guide plate
- Presser foot scale
- @ @ Pin
- 4 Marks on buttonhole foot
- 5 mm (3/16 inch)

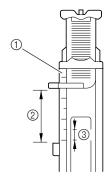

1 Marks on fabric

■ If the button does not fit in the button guide plate

Add together the diameter and thickness of the button, and then set the button guide plate to the calculated length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

- Presser foot scale
- Length of buttonhole (diameter + thickness of button)
- ③ 5 mm (3/16 inch)

Example: For a button with a diameter of 15 mm (9/16 inch) and a thickness of 10 mm (3/8 inch), the button guide plate should be set to 25 mm (1 inch) on the scale.

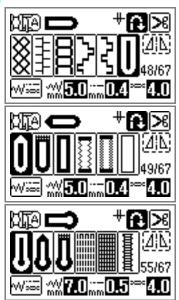

- (1) 10 mm (3/8 inch)
- ② 15 mm (9/16 inch)
- ► The size of the buttonhole is set.

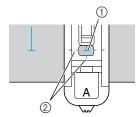

Attach buttonhole foot "A".

• For details, refer to "Replacing the presser foot" (page 42).

Select a stitch.

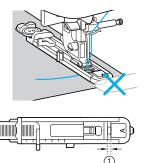

- For details, refer to "Selecting stitching" (page 49).
- Position the fabric with the front end of the buttonhole mark aligned with the red marks on the sides of the buttonhole foot, and then lower the presser foot lever.

- ① Mark on fabric (front)
- ② Red marks on buttonhole foot

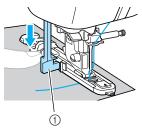

Pass the upper thread down through the hole in the presser foot.

• When lowering the presser foot, do not push in the front of the presser foot.

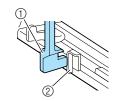

① Do not reduce the gap.

Pull down the buttonhole lever as far as possible.

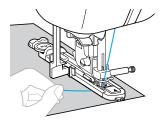

(1) Buttonhole lever

The buttonhole lever is positioned behind the bracket on the buttonhole foot.

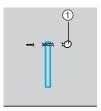

- Buttonhole lever
- **Bracket**
- Gently hold the end of the upper thread in your left hand, and then start sewing.

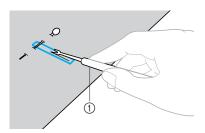

- Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.
- Raise the presser foot lever, remove the fabric, and then cut the thread.
- Raise the buttonhole lever to its original position.

Insert a pin along the inside of one bar tack at the end of the buttonhole stitching to prevent the stitching from being cut.

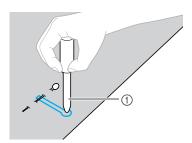

① Pin

Use the seam ripper to cut towards the pin and open the buttonhole.

(1) Seam ripper

For keyhole buttonholes, use the eyelet punch to make a hole in the rounded end of the buttonhole, and then use the seam ripper to cut open the buttonhole.

- 1 Eyelet punch
- When using the eyelet punch, place thick paper or some other protective sheet under the fabric before punching the hole in the fabric.

When opening the buttonhole with the seam ripper, do not place your hands in the cutting direction, otherwise injuries may result if the seam ripper slips.

■ Changing the density of the stitching Adjust the stitch length.

- For details, refer to "Adjusting the stitch length" (page 57).
- If the fabric does not feed (for example, if it is too thick), decrease the density of the stitching.
- Changing the stitch width Adjust the stitch width.

• For details, refer to "Adjusting the stitch width" (page 56).

 Before sewing buttonholes, check the stitch length and width by sewing a trial buttonhole on a scrap piece of fabric.

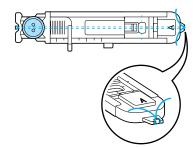

■ Sewing buttonholes on stretch fabrics

When sewing buttonholes on stretch fabrics, use a gimp thread.

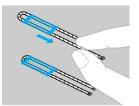

Hook the gimp thread onto the part of buttonhole foot "A" shown in the illustration.

It fits into the grooves, and then loosely tie it.

- Attach buttonhole foot "A".
 - For details, refer to "Replacing the presser foot" (page 42).
- Select stitch ⁵² or ⁵³.
- Adjust the stitch width to the thickness of the gimp thread.
- 6 Lower the presser foot lever and the buttonhole lever, and then start sewing.
- When sewing is finished, gently pull the gimp thread to remove any slack.

Use a handsewing needle to pull the gimp thread to the wrong side of the fabric, and then tie it.

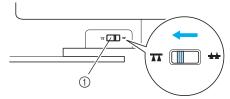

Button sewing

Buttons can be sewn on with the sewing machine. Buttons with two or with four holes can be attached.

Raise the presser foot lever, and then slide the drop feed lever, located at the rear of the machine on the base, to $\overline{\mathbf{A}}$ (to the left as seen from the rear of the machine).

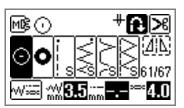

- ① Drop feed lever (as seen from the rear of the machine)
- The feed dogs are lowered.

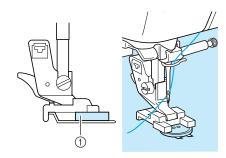

• For details, refer to "Replacing the presser foot" (page 42).

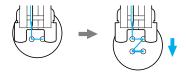

Select stitch ⁶¹⊙.

- For details, refer to "Selecting stitching" (page 49).
- Since the end of the thread will be tied off later, do not set the sewing machine for programmed-thread cutting.
- Adjust the stitch width so that it is the same as the distance between the holes in the button.
- Place the button in the position where it will be sewn, and lower the presser foot lever.

- ① Button
- The button is held in place.
- When attaching four-hole buttons, first sew the two holes closest to you. Then, slide the button so that the needle goes into the two holes toward the rear of the sewing machine, and then sew them in the same way.

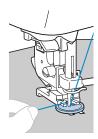

Turn the handwheel toward you (counterclockwise) to check that the needle correctly goes into the two holes of the button. Adjust the stitch width to the distance between the button holes.

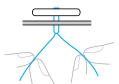

A CAUTION

- When sewing, be sure that the needle does not touch the button, otherwise the needle may bend or break.
- Start sewing.

 Set the sewing speed controller to the left (so that the speed will be slow).

- ➤ The sewing machine automatically stops after sewing reinforcement stitches.
- Do not press (Thread cutter button).
- Use scissors to cut the upper thread and the bobbin thread at the beginning of the stitching. Pull the upper thread at the end of the stitching to the wrong side of the fabric, and then tie it with the bobbin thread.

When you are finished attaching the button, slide the drop feed lever to (to the right as seen from the rear of the machine) to raise the feed dogs.

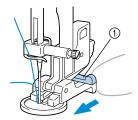

Memo

- The feed dog position switch is normally set to the right side.
- The feed dogs come up when you start sewing again.

■ Attaching a shank to a button

To sew the button with a shank, attach the button with space between it and the fabric, and then wind the thread by hand. This attaches the button securely.

Place the button into button-sewing foot "M", and then pull the shank lever toward you.

- ① Shank lever
- After sewing is finished, cut the upper thread with plenty of excess, wind it around the thread between the button and the fabric, and then tie it to the upper thread at the beginning of the stitching.

Tie together the ends of the bobbin thread at the end and at the beginning of the stitching at the wrong side of the fabric.

Cut off any excess thread.

Zipper Insertion

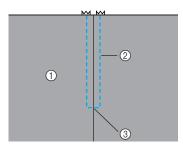

A zipper can be sewn in place.

Stitch Name	Pattern	Application	Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser Foot
			Auto	Manual	Auto	Manual	1001
Straight stitch (center needle position)	3	Attaching zippers Sewing concealed seams and pintucks	3.5 (1/8)	0.0–7.0 (0–1/4)	2.5 (3/32)	0.2–5.0 (1/64–3/16)	ı

There are many methods for inserting zippers. The procedures for inserting a centered zipper and a side zipper are described below.

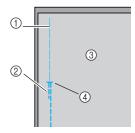

Inserting a centered zipper

Stitching is sewn on both pieces of fabric butted against each other.

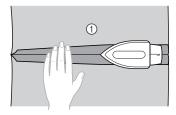

- Right side of fabric
- Stitching
- 3 End of zipper opening
- Attach zigzag foot "J".
- Sew straight stitches up to the zipper opening. With the right sides of the fabric facing each other, sew reverse stitches after reaching the zipper opening.
 - For details, refer to "Basic stitching" (page 78).

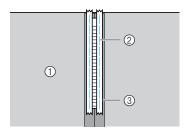

- Basting stitching
- Reverse stitches
- Wrong side of fabric
- 4 End of zipper opening
- Press open the seam allowance from the wrong side of the fabric.

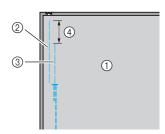

① Wrong side of fabric

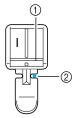

Align the seam with the center of the zipper, and then baste the zipper in place.

- ① Wrong side of fabric
- ② Basting stiching
- ③ Zipper
- Remove about 5 cm (2 inches) from the end of the basting on the outside.

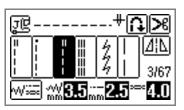

- ① Wrong side of fabric
- ② Zipper basting
- ③ Outside basting
- 4 5 mm (2 inches)
- Attach the presser foot holder to the right pin of zipper foot "I".

- (1) Pin on the right side
- ② Needle drop point
- For details, refer to "Replacing the presser foot" (page 42).

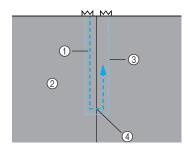

Select stitch ³

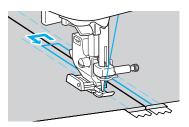

• For details, refer to "Selecting stitching" (page 49).

A CAUTION

- When using zipper foot "I", be sure to select the straight stitch (center needle position), and slowly turn the handwheel toward you (counterclockwise) to check that the needle does not touch the presser foot. If a different stitch is selected or the needle hits the presser foot, the needle may bend or break.
- Topstitch around the zipper.

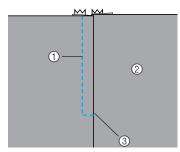

- Stitching
- Right side of fabric
- ③ Basting stitching
- 4 End of zipper opening

- When sewing, be sure that the needle does not touch the zipper, otherwise the needle may bend or break.
- Remove the basting stitching.

Inserting a side zipper

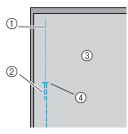

Stitching is visible on only one piece of fabric. Use this type of zipper application for side openings and back openings.

- (1) Stitching
- Right side of fabric
- ③ End of zipper opening

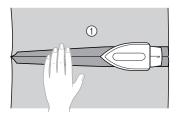

The following procedure will describe how to stitch on the left side, as shown in the illustration.

- Attach zigzag foot "J".
- Sew straight stitches up to the zipper opening. With the right sides of the fabric facing each other, sew reverse stitches after reaching the zipper opening.
 - For details, refer to "Basic stitching" (page
- Using a basting stitch, continue sewing to the edge of the fabric.

- ① Basting stitching
- Reverse stitches
- Wrong side of fabric
- 4 End of zipper opening

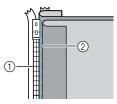

Press open the seam allowance from the wrong side of the fabric.

- ① Wrong side of fabric
- Press the seam allowance so that the right side (the side that will not be stitched) has an extra 3 mm (1/8 inch).

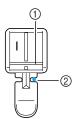

- ① Wrong side of fabric
- ② 3 mm (1/8 inch)
- Align the zipper teeth with the pressed edge of the fabric having the extra 3 mm (1/8 inch), and then baste or pin the zipper in place.

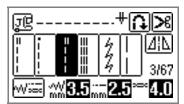

- Zipper teeth
- ② Basting stitching
- Attach the presser foot holder to the right pin of zipper foot "I".

If the stitching will be sewn on the right side, attach the presser foot holder to the left pin of the zipper foot.

- ① Pin on the right side
- ② Needle drop point
- For details, refer to "Replacing the presser foot" (page 42).

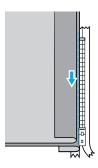

Select stitch ³

• For details, refer to "Selecting stitching" (page 49).

CAUTION

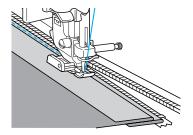

- When using zipper foot "I", be sure to select the straight stitch (center needle position), and slowly turn the handwheel toward you (counterclockwise) to check that the needle does not touch the presser foot. If a different stitch is selected or the needle hits the presser foot, the needle may bend or break.
- Sew the zipper to the piece of fabric with the extra 3 mm (1/8 inch), starting from the base of the zipper.

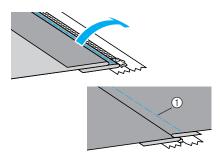

CAUTION

 When sewing, be sure that the needle does not touch the zipper, otherwise the needle may bend or break.

- When you are about 5 cm (2 inches) from the end of the zipper, stop the sewing machine with the needle lowered (in the fabric), raise the presser foot lever.
- Open the zipper and continue sewing.

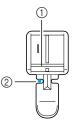

Close the zipper, turn over the fabric, and then baste the other side of the zipper to the fabric.

- Basting stitching
- Attach the presser foot holder to the other pin of zipper foot "I".

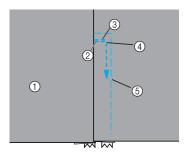

If the presser foot holder was attached to the right pin in step 7, change it to the left pin.

- ① Pin on the left side
- ② Needle drop point

Topstitch around the zipper.

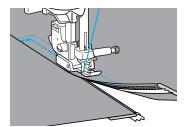

Sew reverse stitches at the end of the zipper opening and align the zipper teeth with the side of the presser foot.

- ① Right side of fabric
- End of zipper opening
- Reverse stitches
- Beginning of stitching
- ⑤ Basting stitching

CAUTION

- When sewing, be sure that the needle does not touch the zipper, otherwise the needle may bend or break.
- When you are about 5 cm (2 inches) from the end of the zipper, stop the sewing machine with the needle lowered (in the fabric), and then raise the presser foot lever.
- Remove the basting stitching, open the zipper, and then continue sewing.

Sewing Stretch Fabrics and Elastic Tape

Stretch fabrics can be sewn and elastic tape can be attached.

Stitch Name	Pattern	Application	Stitch Width [mm (inch.)]		Stitch Length [mm (inch.)]		Presser Foot
			Auto	Manual	Auto	Manual	1001
Stretch stitch	5 4	Stretch fabrics	1.0 (1/16)	1.0–3.0 (1/16–1/8)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
2-point zigzag stitch	9 55	Attaching elastic	5.0 (3/16)	1.5–7.0 (1/16–1/4)	1.0 (1/16)	0.2–4.0 (1/64–3/16)	
3-point zigzag stitch	10		5.0 (3/16)	1.5–7.0 (1/16–1/4)	1.0 (1/16)	0.2–4.0 (1/64–3/16)	J
Elastic- attaching stitch	34 5	Attaching elastic to stretch fabrics	4.0 (3/16)	0.0–7.0 (0–1/4)	1.0 (1/16)	0.2–4.0 (1/64–3/16)	

Observe the corresponding precautions when performing each of the following stitching operations.

Stretch stitching

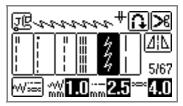

Attach zigzag foot "J".

• For details, refer to "Replacing the presser foot" (page 42).

Select stitch ⁵ [½].

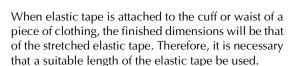

• For details, refer to "Selecting stitching" (page 49).

Sew the fabric without stretching it.

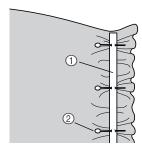

Elastic attaching

Pin the elastic tape to the wrong side of the fabric.

Pin the elastic tape to the fabric at a few points to make sure that the tape is uniformly positioned on the fabric.

- ① Elastic tape
- 2 Pin

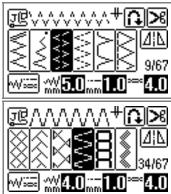

Attach zigzag foot "J".

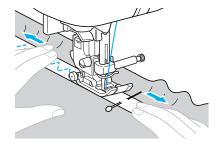

• For details, refer to "Replacing the presser foot" (page 42).

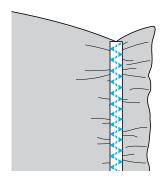

Select a stitch.

- For details, refer to "Selecting stitching" (page 49).
- Sew the elastic tape to the fabric while stretching the tape so that it is the same length as the fabric.

While pulling the fabric behind the presser foot with your left hand, pull the fabric at the pin nearest the front of the presser foot with your right hand.

CAUTION

• When sewing, be sure that the needle does not touch any pins, otherwise the needle may bend or break.

Appliqué, Patchwork and Quilt Stitching

The stitches that can be used for sewing appliqués, patchwork and quilts are described below.

Stitch Name	Pattern	Application		ch Width m (inch)]		ch Length m (inch)]	Presser Foot
			Auto	Manual	Auto	Manual	1001
Zigzag stitch	7	Attaching appliqués (center baseline/reverse stitching)	3.5 (1/8)	0.0–7.0 (0–1/4)	1.4 (1/16)	0.0–4.0 (0–3/16)	
	24	Appliqué quilting, free-motion quilting, satin stitching	3.5 (1/8)	0.0–7.0 (0–1/4)	1.4 (1/16)	0.0–4.0 (0–3/16)	
Appliqué	19	Attaching appliqués	3.5 (1/8)	2.5–7.0 (3/32–1/4)	2.5 (3/32)	1.6–4.0 (1/16–3/16)	
stitch	25	Attaching appliqués and binding	1.5 (1/16)	0.5–7.0 (1/32–1/4)	1.8 (1/16)	1.0–4.0 (1/16–3/16)	
Piecing	21 i	Piecing straight stitching (with a seam allowance of 6.5 mm (1/4 inch) from the right edge of the presser foot)	5.5 (7/32)	0.0–7.0 (0–1/4)	2.0 (1/16)	0.2–5.0 (1/64–3/16)	
straight stitch	22 j	Piecing straight stitching (with a seam allowance of 6.5 mm (1/4 inch) from the left edge of the presser foot)	1.5 (1/16)	0.0–7.0 (0–1/4)	2.0 (1/16)	0.2–5.0 (1/64–3/16)	J
	28		4.0 (3/16)	0.0–7.0 (0–1/4)	1.2 (1/16)	0.2–4.0 (1/64–3/16)	
Joining stitch	29	Patchwork stitching	5.0 (3/16)	2.5–7.0 (3/32–1/4)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
	30		5.0 (3/16)	0.0–7.0 (0–1/4)	1.2 (1/16)	0.2–4.0 (1/64–3/16)	
Mock hand quilting stitch	23 Q	Straight stitch quilting that looks hand quilting	0.0 (0)	0.0–7.0 (0–1/4)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
Quilting stippling	26	Stippling	7.0 (1/4)	1.0–7.0 (1/16–1/4)	1.6 (1/16)	1.0–4.0 (1/16–3/16)	

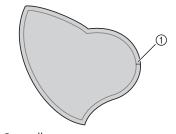

Memo

 Patterns showing a "Q" on the LCD are for quilting and those showing a "P" are for piecing.

Appliqué stitching

Cut out the appliqué, leaving a seam allowance of between 3 and 5 mm (1/8 and 3/16 inch).

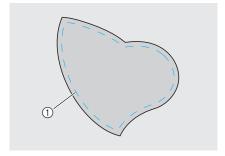

① Seam allowance

Place a pattern made of thick paper or stabilizer on the back of the appliqué, and then fold over the seam allowance using an iron.

Turn the fabric over, and then baste or fuse it onto the fabric that it will be attached to.

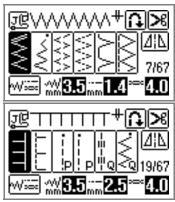

① Basting stitching

Attach zigzag foot "J".

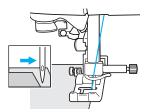

• For details, refer to "Replacing the presser foot" (page 42).

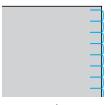

Select a stitch.

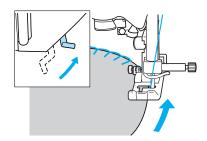

• For details, refer to "Selecting stitching" (page 49).

Turn the handwheel toward you (counterclockwise), and then begin sewing around the edge of the appliqué, making sure that the needle drops just outside of the appliqué.

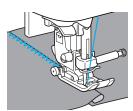

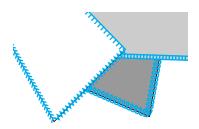

When sewing around corners, stop the machine with the needle in the fabric just outside of the appliqué, raise the presser foot lever, and then turn the fabric as needed to change the sewing direction.

Patchwork (crazy quilt) stitching

- Fold the edge of the top piece of fabric and place it over the lower piece.
- Sew the two pieces of fabric together so the pattern spans over both pieces.

Piecing

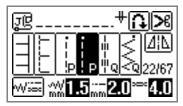

Sewing together two pieces of fabric is called "piecing". The fabric pieces should be cut with a 7 mm (1/4 inch) seam allowance.

Sew a piecing straight stitch 7 mm (1/4 inch) from either the right side or the left side of the presser foot.

- Baste or pin along the seam allowance of the fabric that you wish to piece together.
- Attach zigzag foot "J".

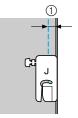

- For details, refer to "Replacing the presser foot" (page 42).
- Select stitch ²¹ or ²² .

- For details, refer to "Selecting stitching" (page 49).
- The piecing straight stitch shows a "P" on the LCD.
- Sew with the side of the presser foot aligned with the edge of the fabric.
 - For a seam allowance on the right side
 Align the right side of the presser foot with
 the edge of the fabric, and sew using stitch

 21 | | | | | | | | | |

(1) 7 mm (1/4 inch)

■ For a seam allowance on the left side

Align the left side of the presser foot with the edge of the fabric, and sew using stitch ²².

① 7 mm (1/4 inch)

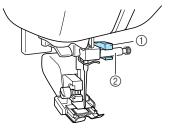

Memo

To change the width of the seam allowance (needle position), adjust the stitch width. For details, refer to "Adjusting the stitch width" (page 56).

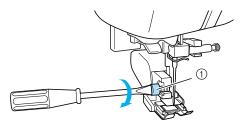

Quilting

Sandwiching batting between the top and bottom layers of fabric is called "quilting". Quilts can easily be sewn using the optional walking foot and the quilting guide.

- Baste the fabric to be quilted.
- Remove the presser foot holder.
 - For details, refer to "Removing and attaching the presser foot holder" (page 44).
- Hook the connecting fork of the walking foot onto the needle clamp screw.

- Connecting fork
- Needle clamp screw
- Lower the presser foot lever, insert the presser foot holder screw, and then tighten the screw with the screwdriver.

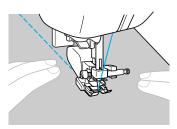

- (1) Presser foot holder screw
- The walking foot is attached.

CAUTION

- Be sure to securely tighten the screws with the screwdriver, otherwise the needle may touch the presser foot, causing it to bend or break.
- Before starting to sew, slowly turn the handwheel toward you (counterclockwise) and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.

- **5**
- Select a stitch.
 - For details, refer to "Selecting stitching" (page 49).
- Place one hand on each side of the presser foot, and then evenly guide the fabric while sewing.

Note

- When sewing with the walking foot, sew at a speed between slow and medium.
- When quilting, use a 90/14 home sewing machine needle.

■ Using the optional quilting guide

Use the quilting guide to sew parallel stitches that are equally spaced.

- Insert the stem of the quilting guide into the hole at the rear of the walking foot or presser foot holder.
 - □ Walking foot

□ Presser foot holder

Adjust the stem of the quilting guide so that the guide aligns with the seam that has already been sewn.

Free-motion quilting

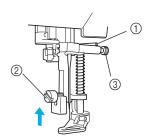

With free-motion quilting, lower the feed dogs (using the drop feed lever) so that the fabric can be moved freely in any direction.

When free-motion quilting, use the following instructions with the optional quilting foot (sold separately).

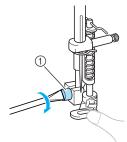

- Remove the presser foot and the presser foot holder.
 - · Refer to "Removing and attaching the presser foot holder" (page 44).
- Secure the quilting foot with the presser foot holder screw.

The pin on the quilting foot should be positioned over the needle clamp screw.

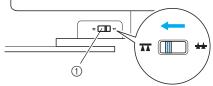

- ① Pin on quilting foot
- Presser foot holder screw
- Needle clamp screw
- Hold the quilting foot in place with your right hand, and then tighten the presser foot holder screw using the screwdriver in your left hand.

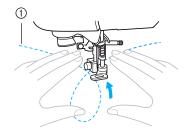

Presser foot holder screw

CAUTION

- Be sure to securely tighten the screws with the screwdriver, otherwise the needle may touch the presser foot, causing it to bend or break.
- Slide the drop feed lever, located at the rear of the machine on the base, to (to the left as seen from the rear of the machine).

- 1) Feed dog position switch (as seen from the rear of the machine)
- The feed dogs are lowered.
- Turn on the sewing machine, and then select a stitch.
 - For details, refer to "Selecting stitching" (page
- Use both hands to hold the fabric taut, and then move the fabric to follow the pattern. Reinforcement stitches are sewn at the beginning and end of sewing.

- 1) Pattern
- After sewing is finished, slide the drop feed lever to + (to the right as seen from the rear of the machine) to raise the feed dogs.
 - Normally, the drop feed lever is positioned at the right.

Satin stitching

A decorative stitch can be sewn by changing the stitch width of a satin stitch. If the sewing machine is set so that the stitch width can be adjusted using the sewing speed controller, the stitch width can quickly and easily be adjusted. In this case, the sewing speed is adjusted with the foot controller.

- Connect the foot controller.
 - For details, refer to "Starting to sew" (page 51)
- Attach zigzag foot "J".

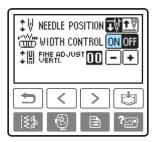

- For details, refer to "Replacing the presser foot" (page 42).
- Turn on the sewing machine, and then press

 (Settings key) in the operation panel.

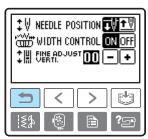

- The settings LCD appears.
- Press ON for stitch width control setting.

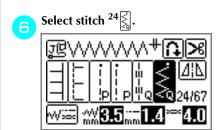

➤ The machine is now set so that the stitch width can be controlled with the sewing speed controller.

If the stitch width control setting is set to "ON", for stitch width will change to sewing speed controller icon "UU".

Press 🖆 (Back key).

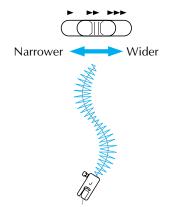

► The initial screen appears again.

- For details, refer to "Selecting stitching" (page 49).
- While sewing, slide the sewing speed controller to adjust the stitch width.

 Slide the controller to the left to make the width narrower. Slide the controller to the right to make the width wider.

- Adjust the sewing speed with the foot controller.
- When you are finished sewing, set the stitch width control setting back to OFF.

Memo

 Although the stitching result differs depending on the type of fabric being sewn and the thickness of the thread being used, for best results, adjust the stitch length to between 0.3 and 0.5 mm (1/64 and 1/32 inch).

Reinforcement Stitching

Reinforce points that will be subject to strain, such as sleeve holes, inseams and pocket corners.

Stitch Name	Pattern	Application	Stitch Width [mm (inch.)]		Stitch Length [mm (inch.)]		Presser Foot
			Auto	Manual	Auto	Manual	1001
Triple stretch stitch	4	Reinforcing the seams of sleeves and inseams	0.0 (0)	0.0–7.0 (0–1/4)	2.5 (3/32)	1.5–4.0 (1/16–3/16)	J
Bar tack stitch	60	Reinforcing the ends of openings, such as the corners of pockets	2.0 (1/16)	1.0–3.0 (1/16–1/8)	0.4 (1/64)	0.3–1.0 (1/64–1/16)	
Darning stitch	58	Darning mediumweight fabrics	7.0 (1/4)	2.5–7.0 (3/32–1/4)	2.0 (1/16)	0.4–2.5 (1/64–3/32)	A
	59	Darning thick fabrics	7.0 (1/4)	2.5–7.0 (3/32–1/4)	2.0 (1/16)	0.4–2.5 (1/64–3/32)	

Triple stretch stitching

Use triple stretch stitching to reinforce sleeve holes and inseams.

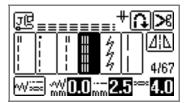

Attach zigzag foot "J".

• For details, refer to "Replacing the presser foot" (page 42).

Select stitch ⁴ .

• For details, refer to "Selecting stitching" (page 49).

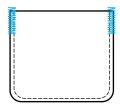

Start sewing.

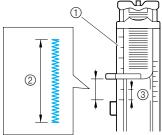

• For details, refer to "Starting to sew" (page 51).

Bar tack stitching

Bar tacks are used to reinforce points subject to strain, such as pocket corners and openings. As an example, the procedure for sewing bar tacks at pocket corners is described below.

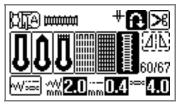

Determine the desired length of the bar tack. Set the button guide plate on buttonhole foot "A" to the desired length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

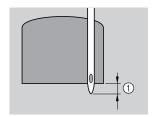

- Presser foot scale
- Length of bar tack
- 5 mm (3/16 inch)
- A bar tack with a maximum length of about 28 mm (1-1/8 inches) can be sewn.

- Attach buttonhole foot "A".
 - For details, refer to "Replacing the presser foot" (page 42).
- Select stitch 60 .

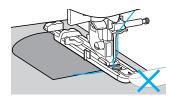

- For details, refer to "Selecting stitching" (page 49).
- Position the fabric so that the opening of the pocket faces toward you, and then lower the presser foot lever so that the needle drops 2 mm (1/16 inch) in front of the pocket opening.

① 2 mm (1/16 inch)

Pass the upper thread down through the hole in the presser foot.

 When lowering the presser foot, do not push in the front of the presser foot, otherwise the bar tack will not be sewn with the correct size.

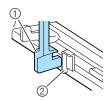

① Do not reduce the gap.

Pull down the buttonhole lever as far as possible.

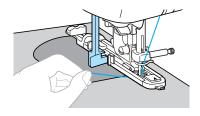

1 Buttonhole lever

The buttonhole lever is positioned behind the bracket on the buttonhole foot.

- ① Buttonhole lever
- ② Bracket
- Gently hold the end of the upper thread in your left hand, and then start sewing.

- Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.
- Raise the presser foot lever, remove the fabric, and then cut the threads.
- Raise the buttonhole lever to its original position.

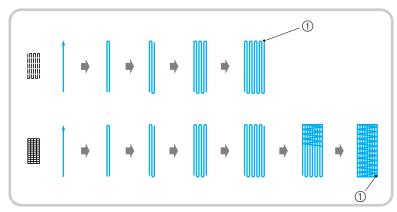

Memo

 If the fabric does not feed, for example, because it is too thick, increase the stitch length. For details, refer to "Adjusting the stitch length" (page 57).

Darning

Fabric that has been torn can be darned. Darning is sewn as shown below.

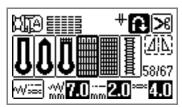

- Reinforcement stitching
- Determine the desired length of the darning. Set the button guide plate on buttonhole foot "A" to the desired length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

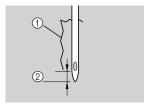

- ① Presser foot scale
- Length of darning
- ② ③ 5 mm (3/16 inch)
- 7 mm (1/4 inch)
- A bar tack with a maximum length of about 28 mm (1-1/8 inches) can be sewn.
- Attach buttonhole foot "A".
 - For details, refer to "Replacing the presser foot" (page 42).

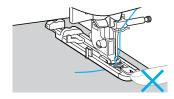

- For details, refer to "Selecting stitching" (page 49).
- Position the fabric so that the needle is 2 mm (1/16 inch) in front of the area to be darned, and then lower the presser foot lever.

- ① Tear
- ② 2 mm (1/16 inch)

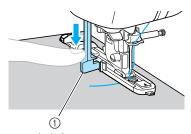

Pass the upper thread down through the hole in the presser foot.

 When lowering the presser foot, do not push in the front of the presser foot, otherwise the darning will not be sewn with the correct size.

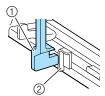

- ① Do not reduce the gap.
- Pull down the buttonhole lever as far as possible.

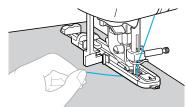

① Buttonhole lever

The buttonhole lever is positioned behind the bracket on the buttonhole foot.

- ① Buttonhole lever
- ② Bracket
- Gently hold the end of the upper thread in your left hand, and then start sewing.

 Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

- Raise the presser foot lever, remove the fabric, and then cut the threads.
- Raise the buttonhole lever to its original position.

Memo

 If the fabric does not feed, for example, because it is too thick, increase the stitch length. For details, refer to "Adjusting the stitch length" (page 57).

Eyelet Stitching

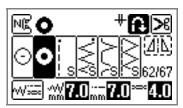

Eyelets, such as those on belts, can be sewn. Three sizes of eyelets are possible: 7 mm, 6 mm and 5 mm (1/4, 15/64 and 3/16 inch).

Stitch Name	Pattern	Application	Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser Foot
			Auto	Manual	Auto	Manual	1001
Eyelet stitch	62	Sewing eyelets, for example, on belts	7.0 (1/4)	7.0, 6.0 or 5.0 (1/4, 15/64 or 3/16)	7.0 (1/4)	7.0, 6.0 or 5.0 (1/4, 15/64 or 3/16)	Z

- For details, refer to "Replacing the presser foot" (page 42).
- Select stitch 62 .

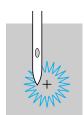

- For details, refer to "Selecting stitching" (page 49).
- Adjust either the stitch width or the stitch length to select the desired eyelet size.

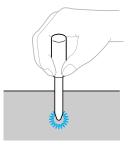

- ① 7mm
- 6mm
- 5mm
- For details, refer to "Adjusting the stitch width" (page 56) and "Adjusting the stitch length" (page 57).

Lower the needle into the fabric at the beginning of the stitching, and then lower the presser foot lever.

- Start sewing.
 - Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.
- Use the eyelet punch to cut a hole in the center of the eyelet.

 When using the eyelet punch, place thick paper or some other protective sheet under the fabric before punching the hole in the fabric.

• If thin thread is used, the stitching may be too open. If this occurs, sew the eyelet twice before removing the fabric, one on top of the other.

Decorative Stitching

The utility stitches contain the following decorative stitches.

Stitch Name	Pattern	Application	Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser
			Auto	Manual	Auto	Manual	Foot
Fagoting	32	Sewing two pieces of fabric	5.0 (3/16)	0.0–7.0 (0–1/4)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
stitch	33	together across an open seam	5.0 (3/16)	2.5–7.0 (3/25–1/4)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
	28		4.0 (3/16)	0.0–7.0 (0–1/4)	1.2 (1/16)	0.2–4.0 (1/64–3/16)	
Joining stitch	29	Decorative bridging stitches	5.0 (3/16)	2.5–7.0 (3/32–1/4)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
	30		5.0 (3/16)	0.0–7.0 (0–1/4)	1.2 (1/16)	0.2–4.0 (1/64–3/16)	J
Shell tuck stitch	20	Shell tuck stitching on collars and curves	4.0 (3/16)	0.0–7.0 (0–1/4)	2.5 (3/32)	0.2–4.0 (1/64–3/16)	
Smocking stitch	31	Smocking fabrics to add texture and elasticity	5.0 (3/16)	0.0–7.0 (0–1/4)	1.6 (1/16)	1.0–4.0 (1/16–3/16)	
	32		5.0 (3/16)	0.0–7.0 (0–1/4)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
	33		5.0 (3/16)	2.5–7.0 (3/32–1/4)	2.5 (3/32)	1.0–4.0 (1/16–3/16)	
Scallop stitch	27	Satin scallop stitching	5.0 (3/16)	2.5–7.0 (3/32–1/4)	0.5 (1/32)	0.1–1.0 (1/64–1/16)	
Decorative stitch	³⁹	Lace sewing, decorative hemming, heirloom stitching, etc.	3.5 (1/8)	1.5–7.0 (1/16–1/4)	2.5 (3/32)	1.6–4.0 (1/16–3/16)	
	40 ** **		6.0 (15/64)	1.5–7.0 (1/16–1/4)	3.0 (1/8)	1.5–4.0 (1/16–3/16)	
	41		5.0 (3/16)	1.5–7.0 (1/16–1/4)	3.5 (1/8)	1.5–4.0 (1/16–3/16)	
	42	Decorative hemming and heirloom stitching, etc. on thin, mediumweight and plain weave fabrics	5.0 (3/16)	1.5–7.0 (1/16–1/4)	4.0 (3/16)	1.5–4.0 (1/16–3/16)	N
	⁴³		5.0 (3/16)	1.5–7.0 (1/16–1/4)	2.5 (3/32)	1.5–4.0 (1/16–3/16)	
	44		5.0 (3/16)	1.5–7.0 (1/16–1/4)	2.0 (1/16)	1.5–4.0 (1/16–3/16)	
	45	Decorative hemming, ribbon threading, heirloom stitching, etc.	5.0 (3/16)	1.5–7.0 (1/16–1/4)	3.0 (1/8)	1.5–4.0 (1/16–3/16)	

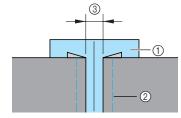

Stitch Name	Pattern	Application	Stitch Width [mm (inch)]		Stitch Length [mm (inch)]		Presser Foot
			Auto	Manual	Auto	Manual	1001
	46	-Heirloom stitching, etc.	6.0 (15/64)	1.5–7.0 (1/16–1/4)	1.6 (1/16)	1.0–4.0 (1/16–3/16)	Z
	47 2		5.0 (3/16)	1.5–7.0 (1/16–1/4)	1.6 (1/16)	1.0–4.0 (1/16–3/16)

Fagoting

Stitching across an open seam is called "fagoting". It is used on blouses and children's clothing. This stitch is more decorative when thicker thread is used.

- Use an iron to fold the two pieces of fabric along their seams.
- Baste the two pieces of fabric, separated by about 4 mm (3/16 inch), onto thin paper or a sheet of water-soluble stabilizer.

If you draw a line down the middle of the thin paper or water-soluble stabilizer, sewing is easier.

- Thin paper or water soluble stabilizer
- Basting stitching
- 4 mm (3/16 inch)
- Attach zigzag foot "J".

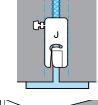

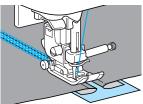

• For details, refer to "Replacing the presser foot" (page 42).

- For details, refer to "Selecting stitching" (page 49).
- Set the stitch width to 7.0 mm (1/4 inch).
 - For details, refer to "Adjusting the stitch width" (page 56).
- Sew with the center of the presser foot aligned along the center of the two pieces of fabric.

After sewing is finished, remove the paper.

Scallop stitching

The wave-shaped repeating pattern that looks like shells is called "scalloping". It is used on the collars of blouses and to decorate the edges of projects.

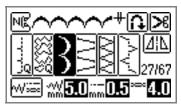

Attach monogramming foot "N".

• For details, refer to "Replacing the presser foot" (page 42).

Select stitch 27].

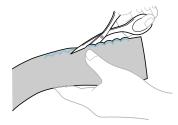

- For details, refer to "Selecting stitching" (page 49).
- Stitch along the edge of the fabric, making sure not to sew directly on the edge of the fabric.

 For better results, apply spray starch onto the fabric and press with a hot iron before it is sewn.

• Be careful not to cut the stitches.

Smocking

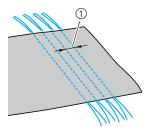

The decorative stitch created by stitching or embroidering over gathers is called "smocking". It is used to decorate the front of blouses or cuffs. The smocking stitch adds texture and elasticity to fabric.

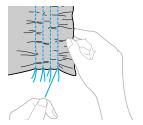

Attach zigzag foot "J".

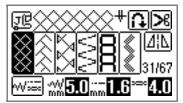

- For details, refer to "Replacing the presser foot" (page 42).
- Select the straight stitch, and then adjust the stitch length to 4.0 mm (3/16 inch) and loosen the thread tension.
 - For details, refer to "Adjusting the stitch length" (page 57) and "Adjusting the thread tension" (page 57).
 - Pull up the bobbin thread. For details, refer to "Pulling up the bobbin thread" (page 36).
- Sew parallel stitching at intervals of 1 cm (3/8 inch).

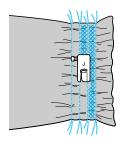

- ① 1 cm (3/8 inch)
- Do not use reverse/reinforcement stitching or thread cutting.
- At the end of the stitching, the thread is pulled out about 5 cm (2 inches).
- Pull the bobbin threads to create gathers. Smooth the gathers by ironing them.

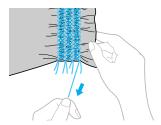

- For details, refer to "Selecting stitching" (page 49).
- Stitch between the straight stitches.

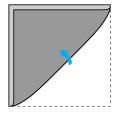

Pull out the threads for the straight stitches.

Shell tuck stitching

The gathers that look like shells are called "shell tucks". They are used to decorate trims, the front of blouses or cuffs made of thin fabrics.

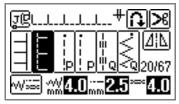

Fold the fabric along the bias.

Attach zigzag foot "J".

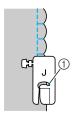

- For details, refer to "Replacing the presser foot" (page 42).
- Select stitch $^{20} \mbox{$\lceil\hspace{-1.5pt}[}$, and then increase the thread tension.

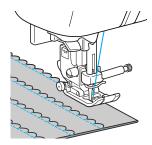

• For details, refer to "Selecting stitching" (page 49) and "Adjusting the thread tension" (page 57).

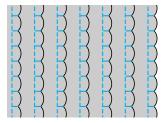

Sew while making sure that the needle drops slightly off the edge of the fabric.

① Needle drop point

Unfold the fabric, and then iron the tucks down to one side.

Joining

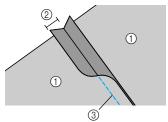

Decorative bridging stitches can be sewn over the seam allowance of joined fabrics. This is used when making a crazy quilt.

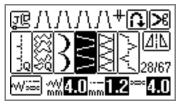

Attach zigzag foot "J".

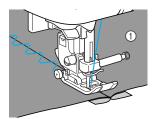

- For details, refer to "Replacing the presser foot" (page 42).
- Sew together the right sides of the two pieces of fabric, and then open up the seam allowances.

- ① Wrong side of fabric
- ② 7 mm (1/4 inch) seam allowance
- ③ Straight stitch
- Select stitch 28 \rightarrow 29 or 30 \rightarrow

- For details, refer to "Selecting stitching" (page 49).
- Turn the fabric over so that the right side faces up, and then sew over the seam with the center of the presser foot aligned with the seam.

① Right side of fabric

Heirloom stitching

When sewing with the wing needle, the needle holes are enlarged, creating a lace-like decorative stitch. This is used to decorate hems and tablecloths on thin or mediumweight fabrics in addition to plain weave fabrics.

Install the wing needle.

- Use a 130/705H 100/16 wing needle.
- For details on installing a needle, refer to "Replacing the needle" (page 40).
- The needle threader cannot be used with the wing needle, otherwise the sewing machine may be damaged. Manually pass the thread through the eye of the needle from the front to the back.

For details, refer to "Threading the needle manually (without using the needle threader)" (page 33).

Attach monogramming foot "N".

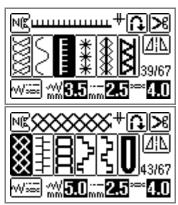

• For details, refer to "Replacing the presser foot" (page 42).

Select a stitch.

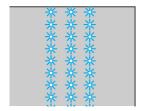

- For details, refer to "Selecting stitching" (page
- When sewing with the wing needle, select a stitch width of 6.0 mm (15/64 inch) or less.

Start sewing.

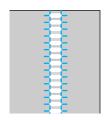

- When sewing with the wing needle, select a stitch width of 6.0 mm (15/64 inch) or less, otherwise the needle may bend or break.
- After adjusting the stitch width, slowly turn the handwheel toward you (counterclockwise) and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.

LITILITY STITCHES

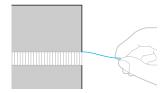

Partially removing threads is called "drawnwork". This gives a beautiful result with fabrics that have a loose weave.

Two ways to create drawnwork are described below.

■ Drawnwork (Example 1)

Pull out several threads from the fabric.

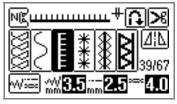

Attach monogramming foot "N".

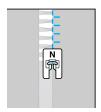

• For details, refer to "Replacing the presser foot" (page 42).

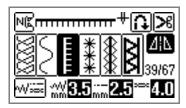

- For details, refer to "Selecting stitching" (page 49).
- With the right side of the fabric facing up, sew along the right edge of the frayed section.

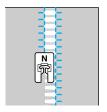

The pattern is mirrored.

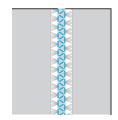

Sew along the other edge of the frayed section so that it looks like the previous stitching.

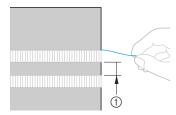

Press Ala, and set the horizontal mirror image key back to OFF.

■ Drawnwork (Example 2)

Pull out several threads from two sections of the fabric, separated by an unfrayed section of about 4 mm (3/16 inch).

① 4 mm (3/16 inch)

Attach monogramming foot "N".

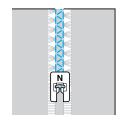

• For details, refer to "Replacing the presser foot" (page 42).

• For details, refer to "Selecting stitching" (page

Sewing the Various Built-in Decorative Patterns

Besides utility stitches, you can sew decorative stitches, satin stitches and cross stitches. All are sewn with monogramming foot "N".

Sewing beautiful patterns

In order to sew the patterns correctly, the following must be considered.

■ Fabric

Before sewing stretch or thin fabrics or fabrics with a coarse weave, affix stabilizer material to the wrong side of the fabric or place a thin sheet of paper, such as tracing paper, under the fabric. Since material puckering or bunched stitches may occur when satin stitches are sewn, be sure to affix stabilizer material to the fabric.

■ Needles and threads

When sewing thin, mediumweight or stretch fabrics, use the ball point needle. When sewing thick fabrics, use a 90/14 home sewing machine needle. In addition, #50 to #60 thread should be used.

■ Trial sewing

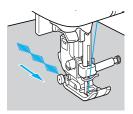

Depending on the type and thickness of the fabric being sewn and whether or not stabilizer material is used, the desired result may not be achieved. Be sure to sew a trial piece of fabric before sewing your project. In addition, while sewing, be sure to guide the fabric with your hands in order to prevent the fabric from slipping.

Sewing patterns

Attach monogramming foot "N".

- For details, refer to "Replacing the presser foot" (page 42).
- Select a stitch.
 - For details, refer to steps 1 through 5 of "Selecting stitching" (page 71).
- Start sewing.

- The stitching is sewn in the direction indicated by the arrow.
- Sew reinforcement stitches.
 - When sewing a pattern, it is useful to first set the automatic reverse/reinforcement stitching setting. For details, refer to "Automatically sewing reverse/reinforcement stitches" (page 59).
- When you are finished sewing, use scissors to trim off any excess threads at the beginning of the stitching and between the patterns.

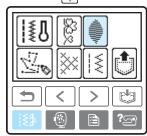

Memo

 For details on adjusting the stitch width and length, refer to "Adjusting the stitch width" (page 56) and "Adjusting the stitch length" (page 57).

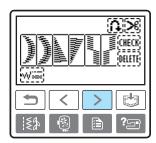

Changing the length for satin stitches

The length for one satin stitch can be changed in five gradations.

Press [₹♠] (Utility stitch key) on the display panel, and select (Satin stitch).

Select a satin stitch pattern.

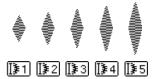

Press [≸3].

It turns to <a>[፮4] and the pattern is longer.

Each time you press it the number changes. You can select from 11 - 15.

Realigning the pattern

The pattern may not be sewn correctly, depending on the type of fabric being sewn or the sewing speed. If this occurs, adjust the pattern while sewing on a piece of scrap fabric that is the same as that used for your project.

Attach monogramming foot "N".

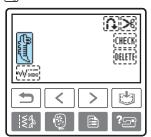

- For details, refer to "Replacing the presser foot" (page 42).
- Press [15] (Utility stitch key) on the display panel, and select (B) (Decorative stitch).

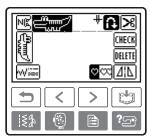

The screen containing the various decorative stitches appears.

Select

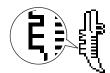

- The pattern alignment stitch is selected.
- Start sewing.

- The pattern for making the adjustment is sewn.
- ➤ The sewing machine stops after it has finished sewing the pattern.
- Check the sewn pattern.

 If the part of the pattern indicated in the illustration is sewn uniformly, the pattern is correctly aligned.

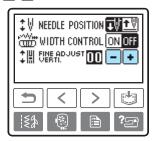

If the pattern is not sewn correctly, follow the steps below to adjust the sewing.

Press (Settings key) in the operation panel.

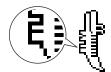

The settings screen appears.

ా Press 🖵 🕩 for vertical pattern adjustment.

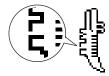

Make the necessary adjustments according to how the pattern is sewn.

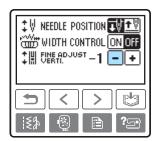

Press • to increase the vertical space in the design.

Press • to decrease the vertical space in the design.

- It returns to the screen for adjusting the pattern.
- Select once again, start the sewing machine and check the stitching. Continue adjusting the pattern until it is sewn correctly.

Sewing Combined Patterns

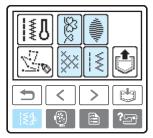

You can combine and sew multiple patterns, and you can store the combined patterns in the sewing machine memory.

Combining patterns

You can sew with combinations of stitches from the decorative stitch, satin stitch, cross stitch and combined utility stitch types. Up to 70 patterns can be combined.

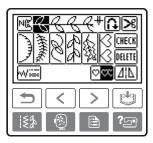

Touch [★ (Utility stitch key) on the operation panel, and select the stitch type. Select any one of the decorative stitch, satin stitch, cross stitch or combined utility stitch types.

Select the first pattern.

The first pattern is selected and appears in on the screen.

 When the sewing is started, the selected pattern is sewn repeatedly until the sewing machine is stopped.

Select the next pattern.

➤ The combined pattern appears on the screen.

- To remove a selected pattern, press on the screen. The pattern that was selected last is removed.
- To combine patterns from different types, press (Back key), and after selecting the type, select the next pattern.
- After all of the desired patterns are selected, start sewing.

➤ The order that the patterns appear on the screen is the order that they will be sewn.

■ Repeating patterns

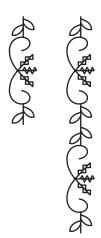

When multiple stitches are combined, the sewing machine stops when the pattern displayed on the screen has been completed. Use the following operations to sew a combined pattern repeatedly.

After the patterns have been combined, press

If pressed again, it turns to va (single sewing).

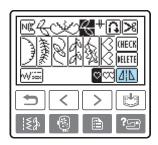

variation variation value of turns to variation value of value of variation value of variation value of variation value of v the specified pattern repeatedly.

■ Mirroring a pattern image

■ Checking the pattern

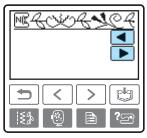

When the specified pattern is not displayed on the screen, check the pattern using the following steps.

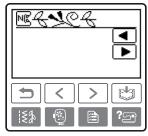

Press CHECK.

The screen for checking the pattern is displayed.

Press ┫ 🕟, and confirm the pattern.

Press (Back key).

The initial screen appears again.

 The combined pattern can be stored for later use. For details, refer to "Storing patterns".

Storing patterns

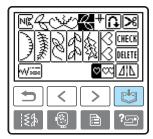

Combined patterns can be stored for later use. Since stored patterns are not lost after the sewing machine is turned off, they can be recalled at any time. Up to 10 patterns can be stored.

■ Storing a pattern

• For details, refer to "Combining patterns" (page 120).

- "Saving..." appears while the pattern is being stored. After the pattern is stored, the initial screen appears again.
- Do not turn off the sewing machine while the pattern is being stored, otherwise the pattern data may be lost.

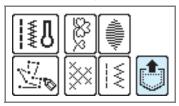

■ Recalling a pattern

(1)

Press

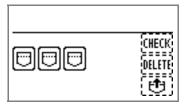

(Recall key).

Recall the stored pattern.

- The screen for selecting a pocket appears.
- Select the pocket where the combined pattern you wish to recall is stored.

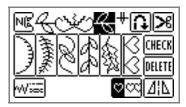

indicates pockets where patterns are already stored.

- The selected pocket is shown in reverse highlighting, and the stored pattern is displayed.
- Check the contents, and then press [1]. Press CHECK to check a pattern that is not displayed completely.

- The stored pattern is recalled.
- The pattern selection screen appears, and you can sew the pattern you have recalled.

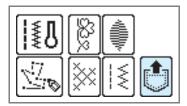

Deleting a stored pattern

Stored pattern in the pockets can be deleted.

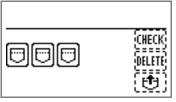

(Recall key).

- Select the pocket where the pattern you wish to delete is stored.
 - [indicates pockets where patterns are already stored.

- ▶ The selected pocket is shown in reverse highlighting, and the stored pattern is displayed.
- Check the contents, then press **DELETE**.

The confirmation message is displayed.

Press OK.

The stored pattern and the pocket are deleted.

Designing a Pattern (My Custom Stitch)

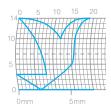

With the My Custom Stitch function, you can sew stitch patterns that you design yourself.

Drawing a sketch of the pattern

Prepare a grid sheet set.

Draw a sketch of the pattern on the grid sheet set.

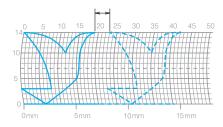

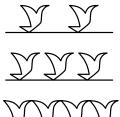

Draw the pattern as one continuous line and with the start point and the end point of the design at the same height.

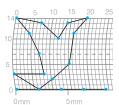

If the pattern will be repeated, determine the space between the repeating patterns.

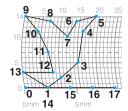

3

Mark the points in the pattern that are positioned at intersections in the grid, and then link those points with a continuous straight line.

4

Determine the sewing order.

For a more attractive stitch, close the pattern by intersecting the line.

Entering the pattern data

Follow the pattern drawn on the grid sheet and program the pattern into the sewing machine.

Attach monogramming foot "N".

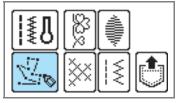

- For details, refer to "Replacing the presser foot" (page 42).
- Press (Utility stitch key) on the operation panel, and then press OK.

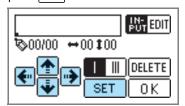

The screen for selecting pattern types is displayed.

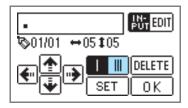

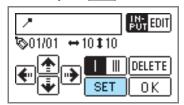

- The screen for entering a pattern appears.
- Check the grid sheet set, and specify the coordinates of the first point. Specify the coordinates using | 🄰, and press SET

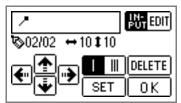

Specify whether single stitching or triple stitching will be sewn between the points. is single stitching, and gives triple stitching.

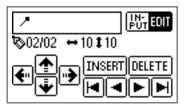

Specify the coordinates of the second point, and then press SET.

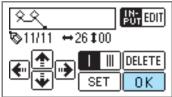

Repeat steps 5 through 6 to specify each point.

- · If you make a mistake entering a point, press DELETE, and the previous point is erased.
- To correct the content entered, press [INTEDIT You can insert, delete and move points.

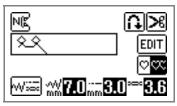

After all points have been entered, press OK.

The embroidery screen appears.

UTILITY STITCHES -

Specify the various stitching settings, such as reverse/reinforcement stitching, in the same way as with other stitches.

• To revise the pattern, press **EDIT**.

Memo

 The pattern you entered can be stored for later use. For details, refer to "Storing patterns" (page 122).

Examples of designs

Enter each of the points indicated in the table to sew the sample stitch.

Embroidering Neatly

This section describes the preparations and basic procedures for embroidering.

What to prepare

The following is necessary for embroidering.

■ Fabric

Prepare the fabric for embroidery. Prepare a piece of fabric a little larger than the embroidery frame that matches the size of the pattern you want to sew.

Note

- Always use stabilizer when sewing embroidery projects, especially when embroidering on lightweight or stretch fabrics. Not using a stabilizer may result in poor quality embroidery designs.
- When embroidering on large pieces of fabric, arrange the fabric so that it does not hang off the table where the sewing machine is placed. If embroidery is done with the fabric hanging off, the embroidery unit movement may be impaired, this could cause the pattern to sew incorrectly.

A CAUTION

- Do not embroider fabrics that are too thick. To check the fabric thickness, attach the embroidery frame to the embroidery unit, and use ① (Needle position button) to raise the needle. If there is space between the presser foot and the fabric, the fabric can be embroidered. If there is not space, do not embroider the fabric. Otherwise, the needle may break, resulting in injury.
- Be careful when sewing overlapping patterns. The needle may not easily pierce the fabric, causing the needle to break.

Stabilizer material

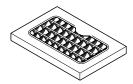

Attach a stabilizer material for embroidery to the fabric to prevent poor quality embroidery designs.

We recommend stabilizer material for embroidery. Use a water soluble sheet on thin materials like organdy and fabrics with a nap like towels. For details, refer to "Optional accessories" (page 9).

■ Embroidery thread

For the upper thread, use the embroidery thread or country thread.

For the bobbin thread, use the embroidery bobbin thread. For details, refer to "Optional accessories" (page 9).

Note

- For good quality embroidery designs be sure to use embroidery thread designed for embroidery machines.
- Before starting to sew, be sure there is enough bobbin thread. If you continue embroidering when the bobbin thread is low, the thread may become tangled.

■ Needle

Use a 75/11 home sewing machine needle. When embroidering on thick fabrics such as denim, use a 90/14 home sewing machine needle.

Memo

- A 75/11 needle is already installed when the sewing machine is purchased.
- When replacing the needle, refer to "Replacing the needle" (page 40).

CAUTION

• Since ball point needles (gold colored) are needles for fabrics where stitches are easily skipped, such as pattern stitching and stretch fabrics, be absolutely sure not to use them for embroidery. The needle may break or bend.

Other

Embroidery frames "small", "medium" and "extra large (multi-position)" are optional. For details, refer to "Optional accessories" (page 9).

Embroidery step by step

The basic steps for embroidery are as follows.

THE Das	are steps for embroidery are as	ionows.				
1	Presser foot attachment	Attach the embroidery foot "Q". For details on attaching the embroidery foot, refer to "Attaching the embroidery foot" (page 133).				
		↓				
2	Checking the needle	Use a needle matched to the fabric. For details on replacing the needle, refer to "Replacing the needle" (page 40).				
		↓				
3	Embroidery unit attachment	Attach the embroidery unit. For details on attaching the embroidery unit, refer to "Attaching the embroidery unit" (page 136).				
		↓				
4	Replacing the bobbin case	When using other kinds of embroidery bobbin thread, use the optional alternate bobbin case (pink marking). For details on replacing the bobbin case, refer to "Replacing the bobbin case" (page 138).				
	•					
5	Bobbin thread setup	For the bobbin thread, wind embroidery bobbin thread and set it in place. For details on setting up the bobbin thread, refer to "Winding/Installing the Bobbin" (page 23).				
	<u> </u>					
6	Fabric preparation	Attach a stabilizer material to the fabric, and hoop it in an embroidery frame. For details on preparing the fabric, refer to "Preparing the Fabric" (page 139).				
		↓				
7	Embroidery frame attachment	Attach the embroidery frame to the embroidery unit. For details on attaching the embroidery frame, refer to "Attaching the Embroidery Frame" (page 143).				
<u></u>						
8	Pattern selection	Turn the power on, and select an embroidery pattern. For details on selecting embroidery patterns, refer to "Selecting Embroidery Patterns" (page 145).				
→						
9	Checking the layout	Check and adjust the size and position of the embroidery. For details on adjusting the layout, refer to "Adjusting the layout" (page 156).				
	↓					
10	Embroidery thread setup	Set up embroidery thread according to the pattern. For details on setting up the thread, refer to "Upper Threading" (page 29).				

Attaching the Embroidery Foot

This section describes how to attach the embroidery foot.

Attaching the embroidery foot

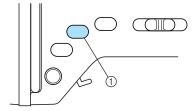

Attach the embroidery foot when embroidering. Have the included embroidery foot "Q" and a screwdriver ready.

- Embroidery foot bar
- Caught by the presser foot holder screw

CAUTION

- Always use the embroidery foot "Q" when embroidering. If the wrong presser foot is used, the needle may hit the presser foot and break or bend.
- Press (1) (Needle position button) once or twice to raise the needle.

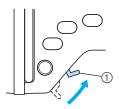

- Needle position button
- The needle goes up.
- Turn off the sewing machine.

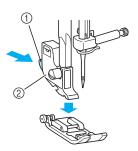

CAUTION

- Before replacing the presser foot, be sure to turn off the sewing machine, otherwise injuries may occur if (Start/stop button) is accidentally pressed and the machine starts sewing.
- Raise the presser foot lever.

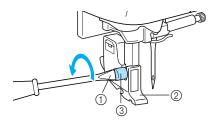

- Presser foot lever
- The presser foot is raised.
- At the time of purchase, the presser foot lever is up.
- Press and hold the black button on the back of the presser foot holder to detach the presser foot.

- Black button
- Presser foot holder

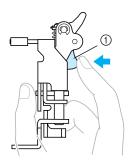

Turn the screwdriver toward the back.

- Screwdriver
- Presser foot holder
- ③ Presser foot holder screw

Hold the embroidery foot with your right hand, as shown.

Hold the embroidery foot with your index finger wrapped around the lever at the back of the foot.

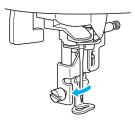

- ① Lever
- While pressing in the lever with your finger, fit the embroidery foot bar over the needle clamp screw to attach the embroidery foot to the presser foot bar.

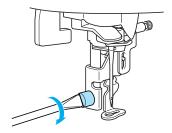

- Embroidery foot bar
- ② Needle clamp screw

Secure the embroidery foot with the presser foot holder screw.

Set the embroidery foot perpendicular.

Tighten the presser foot holder screw.
Turn the screwdriver toward the front.

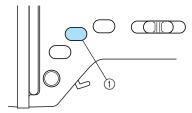

A CAUTION

- Do not hit the needle with your finger or the embroidery foot "Q" when attaching it. The needle may break or cause injury.
- Be sure to tighten the screw with the included screwdriver. If the screw is loose, the needle may hit the presser foot and break or bend.
- Before sewing, always turn the handwheel toward you (counterclockwise) slowly to make sure that the needle does not hit the presser foot. Otherwise, the needle may break or bend.

Removing the embroidery foot

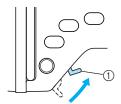

① Needle position button

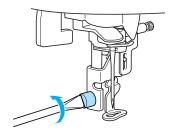

Raise the presser foot lever.

- ① Presser foot lever
- The presser foot is raised.
- While pressing in the lever at the back of the embroidery foot with your finger, loosen the presser foot holder screw, and then remove embroidery foot "Q".

Turn the screwdriver toward the back.

- Attach the presser foot holder.
 - For details, refer to "Attaching the presser foot holder" (page 44).

Attaching the Embroidery Unit

This section describes how to attach the embroidery unit.

Embroidery unit precautions

Cautions for the embroidery unit will be explained below.

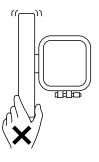

CAUTION

- Do not move the sewing machine with the embroidery unit in place. The embroidery unit may be dropped and cause injury.
- Keep your hands and other objects away from the embroidery carriage and frame. Otherwise injury may result.

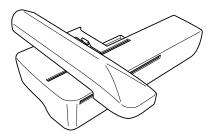

Note

- Do not touch the connector in the embroidery unit connector slot. The connector could be damaged, and it may cause malfunctions.
- Do not lift up on the embroidery carriage, and do not forcefully move it. It may cause malfunctions.

Attaching the embroidery unit

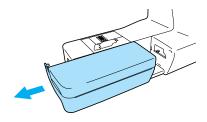

Get the included embroidery unit ready.

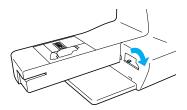

Turn off the sewing machine.

Pull the flat bed attachment off to the left.

Slide the tab on the cover of the connection port in the direction of the arrow to open the cover.

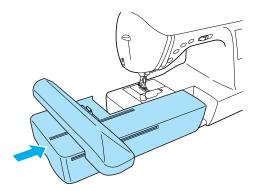

Note

 Be sure to close the cover of the connection port when the embroidery unit is not being used.

Slide the embroidery unit onto the sewing machine arm.

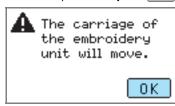

Push it in until it clicks and stops.

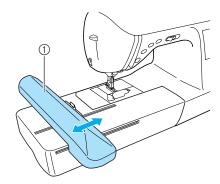

- The embroidery unit is attached.
- Turn on the sewing machine.

- ▶ The confirmation message is displayed.
- Be sure that no objects or hands are near the embroidery unit and press OK .

- When an animation is displayed on the screen, the message above will be displayed if you touch the screen with your finger.
- ▶ The carriage moves to its initial position.

① Carriage

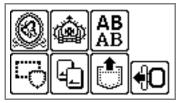

CAUTION

Do not put your hands or other objects near the carriage. It may cause injury.

Note

- If the machine is initialized with hands or objects near the carriage, the screen may return to the initial display. After removing whatever is near the carriage, turn the power on again.
- The screen for selecting the embroidery pattern type is displayed.

· For details on the embroidery patterns, refer to "Selecting Embroidery Patterns" (page 145).

Memo

Utility stitches cannot be selected when the embroidery unit is attached.

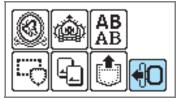

Removing the embroidery unit

Make sure that the sewing machine is completely stopped and follow the instructions below.

• For details on removing the embroidery frame, refer to "Removing the embroidery frame" (page 144).

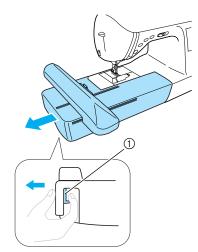

The embroidery carriage moves into a position where it can be stored.

CAUTION

 Always turn off the sewing machine before removing the embroidery unit. It may cause malfunctions if removed when the machine is turned on. Hold the release button on the bottom left of the embroidery unit, and slowly pull the embroidery unit to the left.

- ① Release button
- ➤ The embroidery unit separates from the sewing machine.

CAUTION

 Do not carry the embroidery unit by holding the release button compartment.

Replacing the bobbin case

Use embroidery bobbin thread intended for use with this machine (page 9).

When using other kinds of embroidery bobbin thread, use the optional alternate bobbin case (pink marking). (The bobbin case originally installed in the machine has a green marking.) For details on how to remove the bobbin case, refer to "Cleaning the race" (page 164).

Preparing the Fabric

After attaching a stabilizer material to the embroidery fabric, it is stretched on an embroidery frame.

Attaching a stabilizer material to the fabric

Attach a stabilizer material for embroidery to the fabric to prevent poor quality embroidery designs.

We recommend the stabilizer material for embroidery. Use a water soluble stabilizer on thin materials like organdy and fabrics with a nap like towels. For details, refer to "Optional accessories" (page 9).

Note

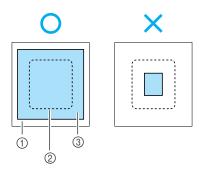

Always use stabilizer material for embroidery with stretch fabrics, thin fabrics, fabrics with a loose weave and fabrics where stitches easily contract.

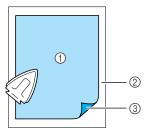

CAUTION

 Always use stabilizer material when sewing embroidery projects. The needle may break or bend if you embroider without using a stabilizer material for thin fabrics or stretch fabrics. Furthermore, the pattern may be sewn incorrectly.

- Fabric
- Size of embroidery frame
- Stabilizer material
- If you are using stabilizers with adhesive, place the adhesive surface of the stabilizer material against the wrong side of the fabric, and iron it with a steam iron.

- Stabilizer material
- Fabric (wrong side)
- Attached surface
- ☐ When it cannot be ironed or placed in the

For fabrics, such as towels, which cannot be ironed or for embroidering in places where ironing is difficult, place the stabilizer material under the fabric, and stretch the fabric in the embroidery frame without attaching the stabilizer.

Setting the fabric in the embroidery frame

The fabric is stretched in the embroidery frame. If the fabric is loose, the quality of the embroidery pattern may be poor. Put the fabric in the frame without slack following the steps below. Have a fabric with a stabilizer material attached and the embroidery frame (medium, small, large or extra large (multi-position)) ready.

■ Embroidery frame (large)

Embroidery can be done in an area with a height of up to 18 cm (7 inches) and a width of up to 13 cm (5 inches). This is used to embroider multiple patterns without changing the fabric position in the frame.

■ Embroidery frame (medium)[option]

Patterns with a height of up to 10 cm (4 inches) and a width of up to 10 cm (4 inches) can be sewn.

■ Embroidery frame (small)[option]

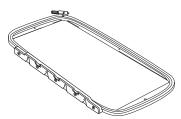

Patterns with a height of up to 2 cm (1 inch) and a width of up to 6 cm (2-1/2 inches) can be sewn. This is used for letters and other small embroidery.

 There are patterns for which embroidery frame (small) cannot be used.

■ Embroidery frame (extra large(multi-position)) [option]

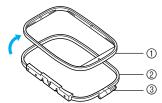

Embroidery can be done in an area with a height of up to 30 cm (12 inches) and a width of up to 13 cm (5 inches). This is used to embroider connected or combined characters or patterns, or large patterns.

CAUTION

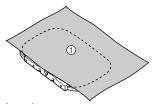

- Use the embroidery frame that matches the size of the pattern being embroidered. Otherwise, the embroidery frame may be hit by the presser foot and cause injury or needle breakage.
- Loosen the embroidery frame adjustment screw and remove the inner and outer frames, placing the outer frame on a flat surface.

 Separate the inner and outer frame by removing inner frame upward.

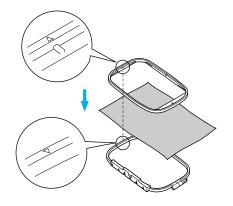

- 1 Inner frame
- Outer frame
- 3 Adjustment screw
- Place the fabric with the stabilizer material on top of the outer frame.

Have the right side of the cloth up.

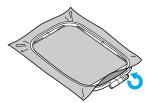

- Right side
- Press the inner frame in from the top of the fabric.

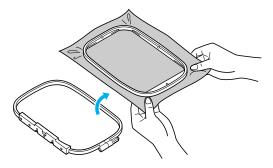

Line up \triangle on the inner frame and ∇ on outer frame.

Tighten the adjustment screw by hand just enough to secure the fabric.

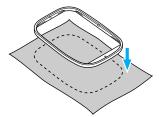

Gently remove the fabric from the frame without loosening the adjustment screw.

Memo

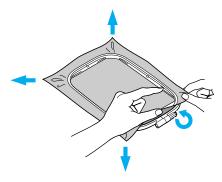

- This precautionary step will help reduce pattern distortion while embroidering.
- Press the inner frame in from the top of the fabric again, lining up \triangle on the inner frame and ∇ on outer frame.

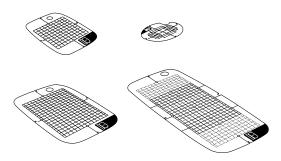

- Outer frame
- Inner frame
- Fabric (right side)
- 4 Stabilizer material
- **(5)** Ledge of outer frame
- Press down firmly until the inner frame is securely pressed against the ledge of the outer frame.

Tighten the adjustment screw while removing any slack in the fabric by hand. The goal is to have a drum-like sound when the stretched fabric is struck lightly.

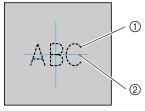

■ Using embroidery sheets

If the embroidery sheet attached to the embroidery frame is used, the embroidery can be sewn in exactly the right position on the fabric.

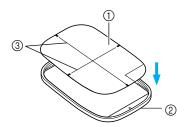

Make a mark with a chalk pen at the center of the position for the pattern to be embroidered.

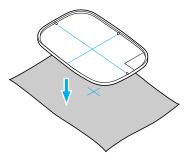

- ① Embroidery pattern
- Mark

2

Place the embroidery sheet on the inner frame.

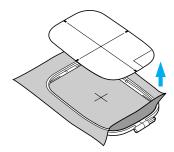

- 1 Embroidery sheet
- 2 Inner frame
- 3 Embroidery sheet base lines
- Line the mark on the fabric up with the base line on the embroidery sheet.

- Place the inner frame with the fabric on the outer frame and stretch the fabric.
 - For details, refer to page 140.

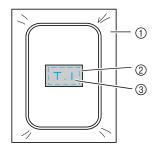

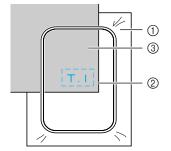

Remove the embroidery sheet.

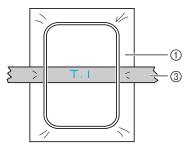

■ Embroidery on fabrics that cannot be stretched on an embroidery frame

When small pieces of fabric that cannot be stretched on an embroidery frame or thin pieces like ribbon are being embroidered, use stabilizer material as a base to stretch on the frame. We recommend stabilizer material for all embroidery.

- Stabilizer material
- ② Tack or spray glue
- ③ Fabric

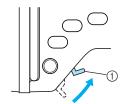

After completing the embroidery, remove the stabilizer material carefully.

Attaching the Embroidery Frame

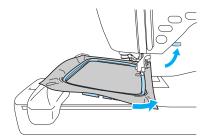

This section describes how to attach the embroidery frame.

Attaching the embroidery frame

- Wind the embroidery bobbin thread onto the bobbin and set it into the bobbin case.
 - For details, refer to "Winding/Installing the Bobbin" (page 23).
- Raise the presser foot lever.

- Presser foot lever
- Pass the embroidery frame under the presser foot while raising the presser foot lever even further.

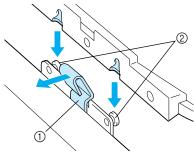

CAUTION

• Do not hit the needle with your finger or the embroidery frame. It may cause injury or needle breakage.

While lightly holding the lever on the frame holder to the left, align the two pins on the embroidery frame holder with the mounting bracket on the frame, and then press the frame into the embroidery frame holder until a click is heard.

- 1 Lever
- ② Pins
- Be sure to insert both pins. If only the forward or the back pin is inserted, the pattern may not turn out correctly.

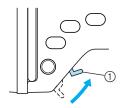

CAUTION

Correctly set the embroidery frame into the embroidery frame holder. Otherwise, the presser foot may hit the embroidery frame, resulting in injury.

Removing the embroidery frame

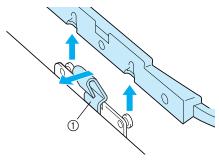

Make sure that the sewing machine is completely stopped and follow the instructions below.

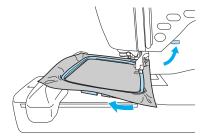

① Presser foot lever

While pushing the lever of the embroidery frame holder to the left, lift the embroidery frame up to remove it.

① Lever

Pass the embroidery frame under the presser foot while raising the presser foot lever even further.

! CAUTION

 Do not hit the needle with your finger or the embroidery frame. It may cause injury or needle breakage.

Selecting Embroidery Patterns

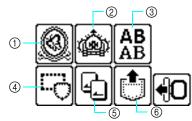

This section provides details on the various types of embroidery patterns available and the procedure for selecting a pattern.

Copyright information

The patterns stored in the sewing machine and embroidery cards are intended for private use only. Any public or commercial use of copyrighted patterns is an infringement of copyright law and is strictly prohibited.

Embroidery pattern types

An embroidery pattern can be selected from the following types available.

- Embroidery patterns
- ② Additional embroidery patterns
- ③ Alphabet characters
- 4 Frame patterns
- ⑤ Embroidery card
- 6 Patterns stored in the machine's memory

Character pattern

There are 6 types of characters (European characters); upper case/lower case/numbers/ symbols.

· For details, refer to "Selecting alphabet characters" (page 148).

Embroidery patterns (Embroidery patterns / Additional embroidery patterns)

There are total 136 patterns. The patterns are completed by changing the upper thread according to the instructions displayed on the screen.

• For details, refer to "Selecting an embroidery pattern" (page 149).

■ Frame patterns

10 shapes, such as squares and circles, can be combined with 12 stitch types.

 For details, refer to "Selecting a frame pattern" (page 150).

■ Embroidery card

Press when selecting patterns from an embroidery card.

• For details, refer to "Using an embroidery card" (page 151).

Patterns stored in the machine's memory

Press when recalling patterns from the machine's memory.

LCD (liquid crystal display) operation

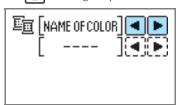

The LCD (liquid crystal display) is operated using the operation keys on the display panel. The use of the keys for embroidery will be explained below.

Operation keys

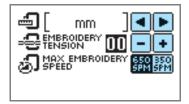

- Returns to the previous screen.
- When there are patterns that are not displayed on the screen (when < or > is displayed), the previous patterns/subsequent patterns are displayed.
- Returns to the type selection screen. The selected pattern is cancelled.
- Press this key to adjust language or change the thread color display or other settings.

Press (Settings key).

NAME OF COLOR: Typical color name
TIME: Time required for embroidering
NEEDLE COUNT: Needle progress number
#123: Select from the following thread color
number sets

- EMBROIDERY (POLYESTER) THREAD#
- COUNTRY (COTTON) THREAD#
- MADEIRA POLY THREAD#
- MADEIRA RAYON THREAD#
- SULKY POLY THREAD#
- ROBISON-ANTON POLY THREAD#

DISPLAY UNIT

The measurement units that are displayed can be selected. [mm/inch]

EMBROIDERY TENSION

The thread tension for embroidering can be adjusted. [-8 to +8]

MAX EMBROIDERY SPEED (SPM) The maximum embroidering speed

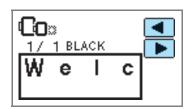

The maximum embroidering speed can be selected. [650SPM/350SPM]

■ LCD button

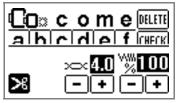

CHECK

When a specific pattern is selected, press this key and then, press to switch the display. The sewing settings such as the specified alphabet character string and color are confirmed.

‱≫

Press this key to change the thread settings.

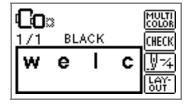

Press this key to select or cancel × programmed thread cutting.

 $\Rightarrow \Rightarrow$ Press + or - to adjust the thread tension.

₩ % Press • or • to change the thread density (character patterns only).

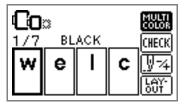

AD-JUST

Press this key to adjust the pattern.

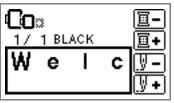

MULTI COLOR

Press this key when you want to change the color character by character in character embroidery. Since the sewing machine stops at the end of each character, the upper thread is changed as you sew. Press this key again to cancel multi-color.

y74

The needle progresses one color or one stitch (if pressed continuously, 9 stitches to 20 stitches) at a time and changes the position for starting the embroidery. This is used when a specific color is not sewn or when restarting the sewing machine after power has been turned off in the middle of the operation.

Back one 囯color

Forward one color

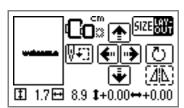

Back one .⊌stitch

Forward one stitch

• For details, refer to "Resewing" (page 160).

LAY-OUT

The position of the pattern within the embroidery frame can be checked, and the size and angle can be changed.

· For details, refer to "Adjusting the layout" (page 156).

Memo

 Keys that appear surrounded with a dotted line cannot be used.

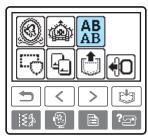

Selecting alphabet characters

Specify the characters for embroidery.

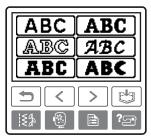

- When "The pattern is too large for the embroidery frame." is displayed, no more characters can be input.
- Characters from different fonts (sans serif and serif, etc.) cannot be combined.

Select the font.

- Enter the characters.

 If a character is pressed by mistake, pressource.
 - ☐ **Example:** Welcome

Aa Switch between uppercase/lowercase

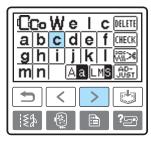

Switch among large/medium/small sizes

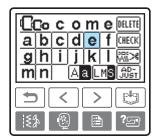

Memo

The characters you entered can be stored for later use. For details, refer to "Storing patterns" (page 158).

Selecting an embroidery pattern

There are total of 136 embroidery patterns, such as fruits and animals, stored in the machine's memory.

70 Embroidery patterns

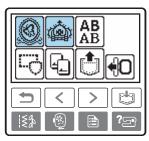

66 Embroidery patterns

Memo

Refer to "Embroidery Pattern Color Change Table" in the Quick reference guide for samples of completed patterns and the thread used.

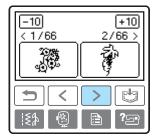

Select the type of the embroidery pattern.

The pattern selection screen is displayed.

Select the pattern.

Switch the screen using (Previous page key) and > (Next page key).

• When -10/+10 is pressed, the display of patterns moves backward/forward 10 patterns.

When a pattern is selected, it can be embroidered.

Selecting a frame pattern

10 shapes, such as squares and circles, can be combined with 12 stitch types.

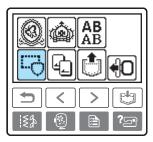

Memo

 Refer to "Frame patterns" in the Quick reference guide for frame pattern shapes and stitches.

Press the frame pattern.

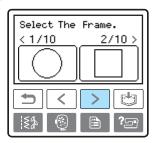

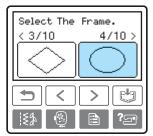

➤ The frame shape selection screen is displayed.

Select the frame shape.

Switch the screen using (Previous page key) (Next page key), and select from the ten types.

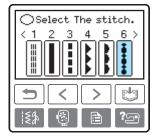

▶ The stitch selection screen is displayed.

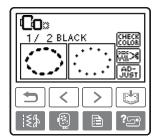

3

Select the stitch.

Switch the screen using (Previous page key) (Next page key), and select from the 12 stitches.

When a stitch is selected, it can be embroidered.

Using an embroidery card

If an embroidery card is used, you can embroider patterns other than the patterns stored in the sewing machine. There are various cards with different themes.

Note

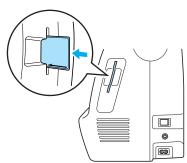

- Always turn off the sewing machine to insert and remove embroidery cards.
- Insert the embroidery card into the embroidery card slot, facing it in the right direction.
- Do not put anything other than an embroidery card in the embroidery card slot.
- When embroidery cards are not in use, keep them in their storage cases.
- Use only embroidery cards manufactured for this machine. Using unauthorized cards may cause your machine to operate incorrectly.
- Embroidery cards purchased in foreign countries may not work with your machine.

Insert the embroidery card in the embroidery card slot on the right side of the sewing machine.

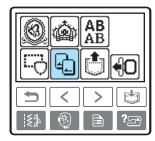

Face the arrow on the embroidery card toward you, and insert it in the direction of the arrow.

Turn on the sewing machine.

Press the embroidery card on the screen.

- ▶ The selection screen for the patterns stored in the card is displayed.
- Select a pattern. The operation is the same as in "Selecting Embroidery Patterns" (page 145).

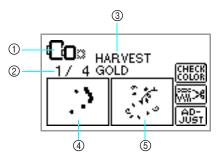

Embroidering

After the preparations are done, you can try embroidering. This section describes the steps for embroidering and appliqueing.

Embroidering a pattern

Embroidery patterns are embroidered with a change of thread after each color.

Prepare embroidery thread of the color shown on the screen.

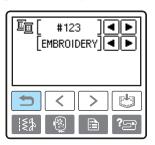

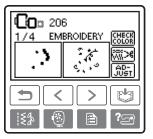

- Embroidery frames that can be used for embroidering
- ② Current color step/Number of colors in design
- ③ Current name of color
- 4 Current color part
- ⑤ Next color part
- The thread color number set displayed for the thread colors can be changed. Press (Settings key), and then change the setting in the settings screen. For details, refer to "LCD (liquid crystal display) operation" (page 146).

☐ **Example:** Embroidery thread number selected

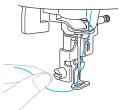

- Set the embroidery thread, and thread the needle.
 - Refer to "Threading the upper thread" (page 29) and "Threading the needle" (page 32).

Note

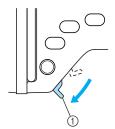

- Before using the needle threader, be sure to lower the presser foot.
- Pass the thread through the embroidery foot hole, and hold it lightly in your left hand.
 Give the thread a little slack.

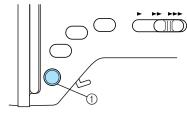

- If the thread is pulled too tight, the needle may break or bend.
- Do not let hands or objects hit the carriage while sewing. The pattern may misalign.

Lower the presser foot lever.

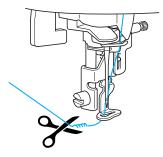

- Presser foot lever
- Press (†) (Start/stop button).

- Start/stop button
- After progressing 5-6 stitches, press () (Start/ stop button) to stop the machine.
- Use scissors to cut the thread at the beginning of the stitching.

Cut the thread at the edge of the stitching.

• If the thread is left at the beginning of the stitching, it may be sewn over as you continue embroidering the pattern, making it very difficult to deal with the thread after the pattern is finished. Trim the thread at the beginning.

- Press (1) (Start/stop button) again.
 - The embroidery begins again.
 - Stitching stops automatically with reinforcement after one color has been completed. When automatic thread cutting is set, the thread is cut.
- Set up embroidery thread for the next color, and repeat steps 1 through 8.
- Cut the excess thread. 10
 - When the last color is sewn, "Finished sewing." will appear on the display. Press OK, and the display will return to the initial screen.

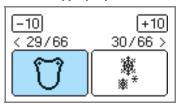

• For the automatic cutting setting, refer to "LCD (liquid crystal display) operation" (page 146).

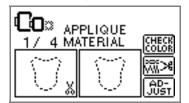

Appliquéing

Prepare the base fabric and the appliqué fabric (appliqué piece).

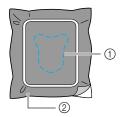

Select an appliqué pattern.

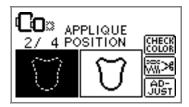

When "APPLIQUE MATERIAL" is displayed on the screen, apply iron-on stabilizer to the back of the appliqué piece fabric, and stretch it on the embroidery frame.

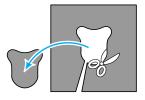

- Lower the presser foot lever, and press ()
 (Start/stop button).
 - The cut-out for the appliqué piece is sewn, and the sewing machine stops.

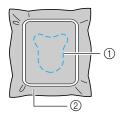

- (1) Cut-out line
- ② Appliqué piece fabric
- "APPLIQUE POSITION" will be displayed on the screen.

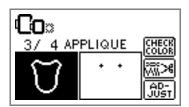

Remove the fabric from the embroidery frame, and cut it out along the cut-out line
Cut carefully along the stitching and remove the thread.

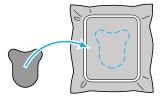

- If it is not cut right on the stitching, it will not be finished neatly.
- Stretch the base fabric on the embroidery frame.
- Set up the thread for appliquéing.
- Lower the presser foot lever, and press (Start/stop button).
 - ➤ The position for the appliqué is stitched, and the sewing machine stops.

- (1) Appliqué position
- ② Base fabric
- "APPLIQUE" will be displayed on the screen.

Apply a thin layer of fabric glue or spray adhesive to the back of the appliqué piece, and attach it in the appliqué position.

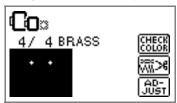

Lower the presser foot lever, and press (†) (Start/stop button).

- When "APPLIQUE MATERIAL", "APPLIQUE POSITION" and "APPLIQUE" are displayed, a specific color thread does not appear. Use a proper color thread to match the appliqué piece.
- Follow the instructions on the screen, and change thread colors as you sew.

Editing and Saving Patterns

This section describes ways to edit, adjust, reposition and memorize patterns.

Adjusting the layout

The pattern is normally positioned in the center of the embroidery frame.

You can check the layout before starting embroidery and change the position and the size.

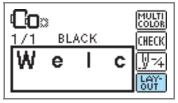

Memo

- Keys that appear surrounded with a dotted line cannot be used.
- After selecting the embroidery pattern, press
 - The sewing screen is displayed.

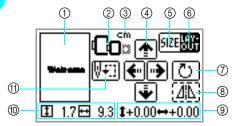

Press LAY-

The layout LCD is displayed.

Check and adjust the layout.

- 1 Layout within the frame
- ② Available embroidery frames
- ③ Display unit (cm/INCH)
- 4 Change position keys
- Size key
- 6 Layout key
- ⑦ Rotation key
- Horizontal mirror image key
- Distance from the center
- Embroidery size (cm)
- ① Starting point key

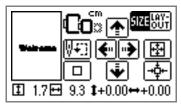

Embroidery frame size

These flash if the pattern was resized, the layout was adjusted, or the recommended embroidery frame size was changed. Embroidery frame icons that appear in gray cannot be used.

Size key

Increases/decreases the size of the pattern. Press to return to the previous screen.

Rotates the pattern 10 degrees to the right

Rotates the pattern 1 degree to the left

Rotates the pattern 1 degree to the

Returns the pattern to its original position

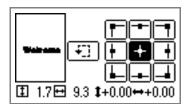

Horizontal mirror image key Mirrors the pattern left and right.

Starting point key

Moves the needle start position to align the needle with the pattern position.

Press to return to the previous screen.

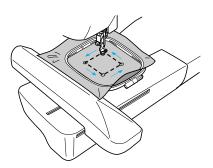

Moves the needle to the position of the selected needle start position.

Moves the frame to check the pattern position.

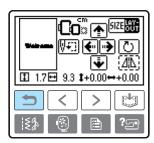

- Never lower the needle when the embroidery frame is moving. The needle could be broken or bent.
- When you have revised the pattern, check the display of available embroidery frames and use an appropriate frame. If you use an embroidery frame not displayed as available for use, the presser foot may strike the frame and possibly cause injury.

4

Press (Back key) to return to the original screen.

Memo

- When the power is turned off, the layout returns to the original setting.
- You can also check the pattern size and distance from the center by pressing for after beginning embroidering.

Storing patterns

The embroidery patterns and the alphabet characters you have customized can be stored in the sewing machine's memory.

Since the stored patterns will not be erased when the power is turned off, you can always recall them for embroidery. This is convenient for storing names and the like. You can store up to 12 patterns or 512 KB of data.

■ Storing a pattern

After selecting the pattern to be stored, press (Memory key).

- After the pattern is stored, the initial screen appears again.
- Do not turn off the sewing machine while the pattern is being stored, otherwise the pattern data may be lost.

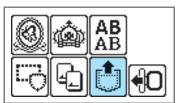

■ Recalling a pattern.

Press

(Recall key).

▶ The stored patterns are displayed.

Select the pattern you wish to recall.

Switch screens using (Previous page key) and (Next page key).

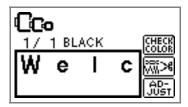

- 1) Total amount of memory used
- Total amount of memory space
- Number of the currently displayed page from the total number of pages
- The selected pattern is shown in reverse highlighting.

Press [t].

To delete the stored pattern, press [EIII].

- The stored pattern is recalled.
- The sewing screen appears, and you can embroider the recalled pattern.

Note

- Only the embroidery patterns and the alphabet characters can be stored in the machine's memory.
- Characters saved from an embroidery card must have the embroidery card inserted in the machine in order to retrieve the memory saved from the embroidery card.

Adjusting the thread tension

If embroidery fails, it is difficult to undo the thread and the fabric may be damaged. Before embroidering, use a scrap of the same fabric to check the adjustment of the thread tension, etc.

To adjust the thread tension, press (Settings key).

Press **–** to weaken the thread tension.

Press + to tighten the thread tension.

Correct thread tension

The thread tension is correct when upper thread is just visible on back of the fabric.

- ① Right side
- Wrong side

■ Upper thread is too tight

The lower thread will be visible on the front of the fabric. In this instance, decrease the upper thread tension.

- ① Right side
- Wrong side

Upper thread is too loose

The upper thread has slack. In this instance, increase the upper thread tension.

- (1) Right side
- ② Wrong side

Resewing

When the wrong upper thread color has been sewn, it can be resewn with the correct color.

Press (1) (Start/stop button) to stop the sewing machine.

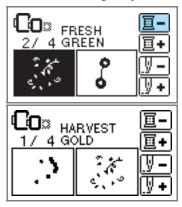

Press 🖫-4.

Press — (Back one color) to return to the beginning of the mistaken color. Press — one more time to go to previous color.

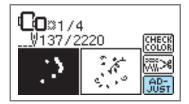

- Set up the correct color for the upper thread.
- Press (1) (Start/stop button) to continue the design.

Thread runs out partway through a design

When the upper thread or the bobbin thread runs out while sewing, the sewing machine stops. Move the needle back about 10 stitches and resume sewing.

- Set up the upper or bobbin thread.
- Press ਜ਼ਿੰਨ੍ਹੀ .

Press 🖫-👍 .

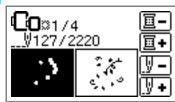

Press (Back one stitch) to move the needle back about 10 stitches.

(Forward one stitch) increases the stitch number.

Co∷1/4 **□-**₩137/2220 **□+**

Restart the embroidery.

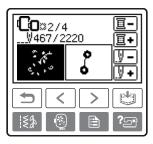

Stopping while embroidering

If the embroidery is stopped before it is complete, check the current needle count before turning off the sewing machine.

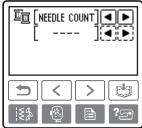

- When the sewing machine is turned off, the embroidery size and layout return to the original setting.
- Press (Start/stop button) to stop the sewing machine.
- Check the current needle count on the screen and make a note of it.

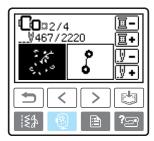

If the needle count is not displayed, press (Settings key), and then use **(Settings key)** to display the following screen.

Press [5] (Back key) to return to the embroidery screen.

(Embroidery key). Press

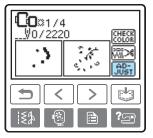

- ▶ The confirmation message is displayed.
- Press OK .

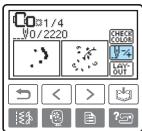

- The selected pattern is turned off, and it returns to the initial embroidery screen.
- Turn off the sewing machine.

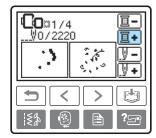

- Always detach the embroidery unit when you move the sewing machine.
- Turn on the sewing machine and select the pattern.
- Press AD-

Press 🕎 4 .

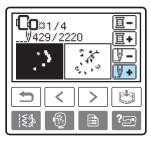

Press (Forward one color) to move to the beginning of the color you want to embroider.

Press (Forward one stitch) to increase the needle count.

If \boxed{y} is pressed continuously, it moves forward $1 \rightarrow 9 \rightarrow 30$ stitches.

Move forward to about 10 stitches before the total number of stitches confirmed in ②.

Restart the embroidery.

Care and Maintenance

Simple sewing machine maintenance operations are described below.

Cleaning the machine surface

If the surface of the machine is dirty, lightly soak a cloth in neutral detergent, squeeze it out firmly, and then wipe the surface of the machine. After cleaning it once with a damp cloth, wipe it again with a dry cloth.

CAUTION

 Unplug the power supply cord before cleaning the machine, otherwise injuries or an electric shock may occur.

Cleaning the race

Sewing performance will suffer if dust collects in the bobbin case, therefore, it should be cleaned periodically.

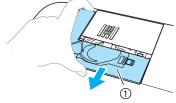

Turn off the sewing machine.

Unplug the power cord from the power supply jack on the right side of the sewing machine.

A CAUTION

- Unplug the power supply cord before cleaning the machine, otherwise injuries or an electric shock may occur.
- Remove the flat bed attachment or the embroidery unit if either is attached.
- Grasp both sides of the needle plate cover, and then slide it toward you.

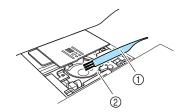

- Needle plate cover
- ▶ The needle plate cover is removed.

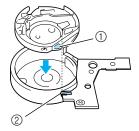

Remove the bobbin case. Grasp the bobbin case, and then pull it out.

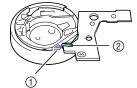

- Bobbin case
- Use the cleaning brush or a vacuum cleaner to remove any lint and dust from the race and its surrounding area.

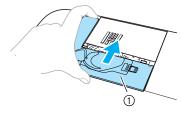

- Cleaning brush
- Race
- Do not apply oil to the bobbin case.
- Insert the bobbin case so that the projection on the bobbin case aligns with the spring.

- ① Projection Spring
- (1) Bobbin case

Insert the tabs on the needle plate cover into the needle plate, and then slide the cover back on.

(1) Needle plate cover

CAUTION

- Never use a bobbin case that is scratched, otherwise the upper thread may become tangled, the needle may break or sewing performance may suffer. For a new bobbin case (part code: XC3153-051 (green marking), XC8167-151(pink marking)), contact your nearest authorized service center.
- Be sure that the bobbin case is correctly installed, otherwise the needle may break.

Troubleshooting

If the machine stops operating correctly, check the following possible problems before requesting service. If the problem persists, contact your retailer or the nearest authorized service center.

machine does not	The presser foot lever is raised.	Lower the presser foot lever.	page 50	
operate.	The start/stop button was pressed, even though the foot controller is connected.	Do not use the start/stop button when the foot controller is connected. To use the start/stop button, disconnect the foot controller.	page 51	
	The needle is incorrectly installed.	Correctly install the needle.		
	The needle clamp screw is loose.	Use the screwdriver to firmly tighten the screw.	page 40	
	The needle is bent or blunt.	Replace the needle.		
	The combination of fabric, thread and needle is not correct.	Select a thread and needle that are appropriate for the type of fabric being sewn.	page 39	
	The presser foot that is used is not appropriate for the type of stitch that you wish to sew.	Attach the presser foot that is appropriate for the type of stitch that you wish to sew.	page 66	
	The upper thread tension is too tight.	Loosen the upper thread tension.	page 57	
The needle breaks.	The fabric is pulled too much.	Lightly guide the fabric.	_	
	The spool is incorrectly installed.	Correctly install the spool.	page 29	
	The area around the hole in the needle plate is scratched, or has a burr on it.	Replace the needle plate. Contact your retailer or the nearest authorized service center.	-	
	The area around the hole in the presser foot is scratched, or has a burr on it.	Replace the presser foot. Contact your retailer or the nearest authorized service center.	-	
	The bobbin case is scratched, or has a burr on it.	Replace the bobbin case. Contact your retailer or the nearest authorized service center.	-	
	A bobbin designed specifically for this machine is not used.	Incorrect bobbins will not work properly. Only use a bobbin designed specifically for this machine.	page 23	

Symptom	Probable Cause	Remedy	Reference
	The upper thread was not threaded correctly (for example, the spool is not installed correctly, the spool cap is too big for the spool being used, or the thread has come out of the needle bar thread guide).	Correct the upper threading.	page 29
	There are knots or tangles in the thread.	Remove any knots or tangles.	-
	The selected needle is not appropriate for the thread being used.	Select a needle that is appropriate for the type of thread being used.	page 39
	The upper thread tension is too tight.	Loosen the upper thread tension.	page 57
The upper thread breaks.	The thread is tangled, for example, in the bobbin case.	Remove the tangled thread. If the thread is tangled in the bobbin case, clean the race.	page 164

does not come on.	The machine is not turned on.	Turn on the machine.	page 17

Symptom	Probable Cause	Remedy	Reference
Nothing appears in the LCD.	The brightness of the LCD is either too light or too dark.	Adjust the brightness of the LCD.	page 174
Machine does not operate when button is pressed.	An animation is displayed on the LCD.	Touch the LCD with your finger, and the animation will disappear.	page 18
Embroidery unit	No pattern selected.	Select a pattern.	page 145
does not move.	The embroidery unit is not set up correctly.	Set the embroidery unit up correctly.	page 136
	The fabric is not fully stretched on the embroidery frame. The fabric is loose.	Stretch the fabric properly on the embroidery frame.	page 140
	No stabilizer material is attached.	Always use stabilizer material for embroidery with stretch fabrics, thin fabrics, fabrics with a loose weave and fabrics where stitches easily contract.	page 139
	The thread is tangled and the bobbin case, etc., is plugged up.	Remove the tangled thread. When the bobbin case is plugged up, clean the race.	page 164
	The thread tension is incorrect.	Adjust the tension of the upper thread.	page 159
Embroidery not neatly done.	Objects are placed near the carriage or embroidery frame.	If the embroidery unit carriage or embroidery frame bumps into objects, the pattern will be misaligned. Do not place objects within the range of embroidery frame motion.	page 137
	Material coming out of the embroidery frame is causing problems.	Stretch the fabric on the frame once again so that the material coming out of the embroidery frame does not cause problems, rotate the pattern and embroider.	-
	A heavy fabric is being embroidered, and the fabric is hanging off the table.	If embroidery is done with the fabric hanging off the table, the embroidery unit movement will be impaired. Support the fabric while embroidering.	-
	The fabric is catching. It is pinched.	Stop the sewing machine and set the fabric up correctly.	_
	The carriage was moved while the embroidery frame was being removed or attached during embroidery.	If the carriage is moved during the process, the pattern may be misaligned. Be careful when removing or attaching the embroidery frame.	-

Error messages

When erroneous operations are performed messages and advice on operation will be displayed on the LCD. Follow what is displayed. If you press CLOSE or do the operation correctly while the error message is displayed, the message disappears.

• Be sure to rethread the machine. If you press ① (Start/stop button) without rethreading the machine, the thread tension may be wrong or the needle may break and cause injury.

Error Message	Probable Cause
The safety device has been activated.	The upper thread has become tangled around the bobbin case, and the needle is bent and hitting the needle plate, etc., so the sewing machine stops (refer to page 166).
① Check and rethread the upper thread.	Upper thread broken. Upper thread not set up correctly. Upper thread has run out.
① Cannot sew on this screen.	Either the start/stop button or the reverse/reinforcement stitch button was pushed at a LCD screen other than the sewing LCD screen.
① Lower the presser foot lever.	The start/stop button, reverse/reinforcement stitch button or thread cutter button was pressed while the presser foot was raised.
① Insert an embroidery card.	on the LCD was pressed when no card was inserted.
① This embroidery card can not be used on this machine.	A card that cannot be used with this product has been inserted, and you tried to select a pattern from the card.
No more stitches can be combined.	You tried to combine more than 70 decorative stitches, satin stitches, cross stitches or combined utility stitches.
① Turn off the machine, and attach the embroidery unit.	The start/stop button, the embroidery key, or the memory key is pressed in embroidery mode, but the embroidery unit is not attached.
① This button does not operate when the embroidery unit is attached.	You tried a function that cannot be used when the embroidery unit is attached.
① Press the needle position button to raise the needle.	You tried to select an embroidery pattern or change the layout when the needle was down. The machine is turned on while the needle is lowered and the embroidery unit is attached.

Error Message	Probable Cause
① Disconnect the foot controller.	The start/stop button was pressed while the foot controller was connected. You tried to use the foot controller for embroidery.
① Lift the buttonhole lever.	A stitch other than the buttonhole, bar tack or darning stitch was selected and the start/stop button was pressed while the buttonhole lever is lowered.
① Lower the buttonhole lever.	The buttonhole, bar tack or darning stitch was selected and the start/stop button was pressed while the buttonhole lever is raised.
① The pattern is too large for the embroidery frame.	You tried to set a number of characters that will not fit within the frame.
① Select a pattern.	The start/stop button or reverse/reinforcement stitch button was pressed when no pattern is selected.
① Change to the single needle mode.	The twin needle setting is selected while a pattern that cannot be sewn with the twin needle is selected.
① Change the speed controller mode to "OFF".	The start/stop button was pressed without connecting the foot controller while the setting for adjusting the stitch width using the sewing speed controller is set to [ON]. You have selected a pattern for which width control cannot be used.
① OK to delete the selected pattern?	You pressed the back key or the utility stitch key or the embroidery key while a pattern was selected.
① The bobbin thread is running out.	Bobbin thread has run out. Little bobbin thread remains.
① Return the bobbin winding shaft to left.	The reverse/reinforcement stitch button, needle position button or thread cutter button was pressed while the bobbin winder shaft is moved to the right.
① Twin needles can not be used for this pattern.	A twin needle was set up with a pattern where a twin needle cannot be selected.
Saving	A pattern is being stored.
Winding bobbin thread	The bobbin winder is winding the bobbin.
A The carriage of the embroidery unit will move.	When the embroidery unit is attached.

Error Message	Probable Cause
① OK to save the current settings?	You changed the stitch pattern settings, and then tried to save them by pressing the manual memory key.
① Can not recognize the data. The data may be corrupted.	There is a possibility that the data for the selected pattern is corrupted.
① This pattern cannot be used.	You try to retrieve a pattern downloaded as one for a different machine.
① Not enough available memory. Delete another pattern?	The memory is full and the stitch or pattern cannot be saved.
① Total size of the pattern is too large. Rotate the pattern.	The machine is in embroidery mode and the combined character pattern is too large for the embroidery frame. You can rotate the pattern 90 degrees and continue combining characters.
Deleting	The machine is deleting a previously saved pattern while in embroidery edit mode.
① Raise presser foot lever.	This message is displayed when the embroidery unit is trying to initialize while the embroidery foot is lowered.
① Data volume is too large for this pattern.	You tried to create a design with too many points with the My Custom Stitch function.
() Finish editing the pattern before sewing the pattern.	The start/stop button was pressed before the editing was completed with the My custom stitch function.

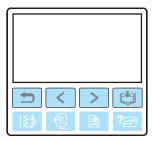

Adjusting the LCD

If nothing appears in the LCD when the sewing machine is turned on, the brightness of the LCD is either too light or too dark. In such a case, perform the following operation.

Turn the power "ON" while pressing any of the display panel buttons.

Press - or +.

Turn "OFF" the sewing machine, then turn it "ON" again.

Operation beep

Each time a key is pressed you will hear one beep. If an incorrect operation is performed you will hear two or four beeps.

- If a key is pressed (correct operation)
 One beep sounds.
- If an incorrect operation is performed Two or four beeps sound.
- If the machine locks up, for example, because the thread is tangled

The sewing machine beeps for four seconds and the machine automatically stops.

Be sure to check for the cause of the error, and correct it before continuing to sew.

Canceling the operation beep

When the sewing machine is purchased, it is set to beep each time an operation panel key is pressed. This setting can be changed so that the machine does not beep.

Turn on the sewing machine.

- The LCD comes on.
- Press (Settings key) in the operation panel.

- The settings LCD appears.
- Press (Next page key) three times.
- Press OFF for the buzzer.

▶ The LCD for changing the beep setting appears.

Press (Back key).

The initial stitch LCD appears again.
